Product Information

Brett Delta is designed to complement the ever popular Brett Omega block paving range. With the same 2:1 ratio on plan dimensions, but 33% longer than Omega in both direction, it offers a 76% larger surface area. Hence giving a fresh modern aesthetic with a quicker and easier installation.

Available in one thickness and three colours, Brett Delta is suitable for nearly any domestic application.

Brett Delta can be installed alone in the common paving patterns such as herringbone, basket weave and stretcher course, but it can also be combined with Brett 50mm Omega to offer many alternative pattern designs. It also has a complementary range of kerbs.
Like Brett Omega, Delta is manufactured regionally therefore subtle shade variations between the two should be signifcantly reduced.

Brett Delta pavements should be designed and constructed in accordance with the requirements of BS 7533.

Product Specifications

Product Type	Precast Concrete Paving Block
Manufactured and tested to	BS EN 1338 : 2003
Characteristic Tensile Splitting Strength (T)	≥ 3.6 MPa nor have a failure load of less than 250N/mm of splitting length. (28 day test results)
Abrasion Resistance (Wide Wheel Test)	Class 3 all results measuring ≤ 23
Unpolished Slip Resistance Value (USRV)	≥ 55 Potential for slip - Low
Dimensional Tolerance	Thickness ± 3mm ; Plan Size ± 2mm
Weathering Resistance	Class 3 < 1,0 with no individual result ≤ 1,5
