Introduction

About us

At Brett, we are modern in our thinking. We're a service-led company anticipating your needs, being proactive and having integrity in everything we do.

Our products are manufactured from high quality concrete, porcelain or ethically sourced natural stone and are designed to enhance any outside space with beautiful products, including block paving, paving slabs and kerb systems. Brett makes it all simple. We believe in delivering what we say – every time; to promote your outside experiences and infinite possibilities.

Built on relationships

'What can we do for you', sounds much better than 'what we do'. So, when you talk to Brett about inspiring outside spaces, we'll ensure everything is made that little bit easier, a little bit more exciting – and with a straightforward attitude.

We are a trusted and established independent business. We understand our customers, their aspirations and how we can enable possibilities to become reality. And we connect through innovation, collaboration, knowledge and support, to create an outside space to inspire and build relationships to be proud of.

Brett. Built on relationships.

Turn your dreams into a reality.

Creating an outside space to suit your style can seem daunting, however, with your vision and our expertise, simply follow these four steps in order to achieve your dream space.

Everything's Easy. Anything's Possible.

Did you know?

Did you know your product choice accounts for roughly 20% of your landscaping budget?

This means that you can feel confident in choosing any of our products without blowing your budget. The remaining 80% of cost is just as essential as this equates to the installation and sub-base materials. Investing in this will ensure your paving stands the test of time.

Read more about our Brett Approved Installers on Page 92 - 93

Be different. Be inspired

Outside space is an important part of everyday living. Beautifully crafted outdoor environments add positive energy to our wellbeing as well as value to our homes.

So it's worth taking the time to get it right. With Brett on your side, you can create a space to enjoy for years. This brochure showcases what we can do for you, helping you get a little closer to where you want to be.

Contact your local **Brett Approved Installer** for advice on how to help design and achieve your garden or driveway vision.

Gardens

Your garden is important. It's a place for relaxation, to entertain, for the children to play... to escape the everyday. Landscaping your garden can mean many things to different people, from a tranquil lush green haven, to a more contemporary affair with structural planting, gravels and linear styling.

Whatever your taste, Brett Landscaping can create your wildest ideas with wonderful products to complement the colours, textures and style of your garden foliage and your home. Even the smallest areas can be enhanced by our landscaping products, to provide a sense of clear space, drawing focus to specific features, or to provide colour and textural contrast.

Pack options

Our garden paving is offered in a number of configurations to help you to determine the best options for your project.

Patio packs: Mixed size flags covering a set area in the same pack so that a number of attractive patterns and layouts can be achieved.

Linear packs: Linear sizes in the same pack to create a stylish range of contemporary and aesthetic options.

Single size packs: Packs containing all one size of flag.

Split packs: Available in our single size porcelain paving offer. Reduced sized pack enabling you to order a more convenient pack size.

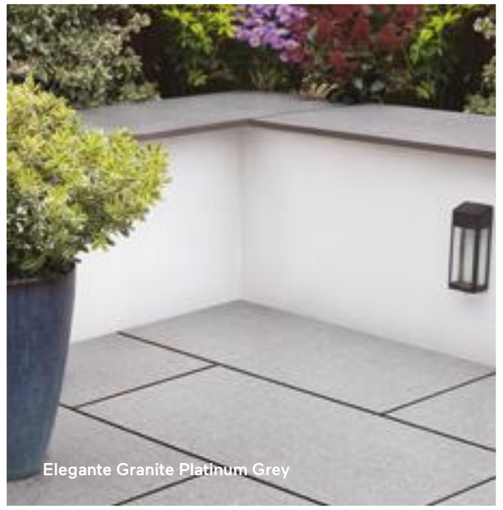
Porcelain paving

The modern day solution to garden paving. Enjoy the timeless beauty of our porcelain paving options, including the unique hybrid GeoCeramica® range which is also suitable for driveways.

- Consistent, long-lasting beauty
- Extremely strong and durable
- Easy to maintain and resistant to everyday staining

See **brettlandscaping.co.uk** for more information



Elegante Granite Platinum Grey

Riven Sandstone Mountain Mist

Natural stone paving

Specially selected classic natural stone to enrich your outdoor space with warmth and quality.

- Each piece is unique especially in colour
- Wide variety of colours and textures
- Responsibly Sourced products

See **brettlandscaping.co.uk** for more information

Garden landscaping explained

Landscaping isn't just in our name, it's in our heritage. The Brett Landscaping range of blocks, flags, walling and edgings has transformed the gardens of many beautiful properties throughout the UK. From the sleek lines of our porcelain ranges to the textured aesthetics of our natural stone, we're confident you'll find a product to suit your style.

Your garden is more than an extension of your home, it's an investment, a place you can enjoy all year round. Brett products, together with our inherent design knowledge can bring your outside space to life. An inspirational space that you can be truly proud of.

With all this in mind, landscaping shouldn't be rushed, planning is key. What will be the primary focus of your garden, is it a small or large area? Would blocks be more appropriate than flags and do you require a play area for children, a space in the sunshine or in the shade – or both?

Chaucer Charcoal

Rippled Limestone Honey & Alpha Kerb Autumn Gold

Riven Slate Olive Black

And then of course there's planting. It's important to select the correct species. Check with your garden centre on the height and spread of your chosen shrubs and trees, factor them into the design and consider the shape of a lawn if required; will it have soft curves, or should your design incorporate a more contemporary, geometric lawn?

Your local **Brett Approved Installer** can help you through the process.

Everything's Easy. Anything's Possible.

Porcelain explained

Brett has four porcelain product ranges – GeoCeramica®, Eden, Elegante and Eclipse – all of which are manufactured to the highest standards. They are precision cut after processing to ensure the finest tolerances and have a proven low slip potential when tested against UK standards.

There are a multitude of external porcelain and ceramic paving options now available in the market. But not everything's the same.

Elegante Granite Platinum Grey

Eclipse Lunar with an Omega Charcoal border

Here's our simple guide to getting the right product for your project

- Insist on porcelain rather than ceramic; it's stronger, more stain resistant, scratch, water and frost resistant.
- Always ask for a Declaration of Performance (DOP) for your chosen product to be sure it is porcelain. Look for water absorption data of less than 0.5% as well as UK measures of slip resistance in accordance with HSE guidelines (do not rely on 'R' values). These factors are the key to a good quality product.
- Looks are a key consideration when selecting porcelain paving. A good porcelain supplier should be able to tell you exactly how many different surface variations there are in a specific product – the more variations, the better the look.
- Be sure to get reputable installation advice from a Brett Approved Installer. Some products require adhesion aids that need to be considered in your overall costs. Products like our GeoCeramica® porcelain range, however, do not require these due to their hybrid pre-bonded, mortar-base design.

All of our supporting information on our Porcelain paving ranges is available at brettlandscaping.co.uk.

GeoCeramica® Fiordi & Mosaik

GeoCeramica® Fiordi

Fiordi is available as 60mm, 40mm and 10mm products and has a textured, variegated surface inspired by natural sandstone. This brings a unique aesthetic mixture of light and shade effects to your design, and creates a premium finish which will retain its looks for years to come.

GeoCeramica® Mosaik

Mosaik is available as a 40mm product and has a creative Mosaik pattern that allows you to create a modern, romantic ambience. You can also use Mosaik with the Fiordi range (40mm), adding extra character and detailing to your design.

- Step treads made to order
- 60mm Fiordi available for drives
- 10mm product for indoors and detailing
- See pages 82 - 89 for plan sizes & pack information

Drives

A driveway isn't simply a place for your car, it's the entrance to your home. It should be inviting, impactful, stylish and complementary to the aesthetics of your home. It can add value to your property, presenting that all-important kerb appeal.

Speaking of which, our kerbs are as attractive as the rest of our products. Simply, the Brett Landscape driveway paving product range will help your home make an entrance. Our blocks come in different depths for different uses, but for driveways that are used to accommodate normal family cars, we'd recommend our 'light usage' range of 50mm and 60mm blocks. Speak to one of our Brett Approved Installers to ensure you have the correct product for your application.

GeoCeramica® Bluestone

Porcelain paving

Blocks and gravel aren't the only driveway solutions. With the advances in concrete technology, Brett Landscaping can bring you the crisp, contemporary look of porcelain for your driveway. GeoCeramica® Bluestone and Fiordi have an elegant porcelain flag permanently bonded to a concrete base, combining beauty with strength, stability and drainage. 60mm GeoCeramica® has been tried and tested for use on driveways where the density of porcelain makes it resistant to the staining usually associated with constant vehicle use.

See **brettlandscaping.co.uk** for more information

Concrete paving

Concrete blocks have been the staple of driveway design for many years, and it's easy to understand why. Not only do they offer a robust, easy-to-install solution for your driveway paving, but also come in a multitude of styles, textures and colours to create a lasting design to be proud of.

See **brettlandscaping.co.uk** for more information

Aura Silver Fleck

Alpha Flow Charcoal

Permeable paving

Helping towards the environmental stability of our planet is now more important than ever, and homeowners are taking the initiative, helping to combat flooding by reducing the amount of rainwater that runs from their gardens. Brett Landscaping offers a number of block products to help homeowners design a driveway that not only looks beautiful but helps manage surface water run-off. You can also add further interest by including our permeable gravels to your design, helping you meet the standards set by your Local Authority. As a homeowner, you now have a legal obligation to avoid surface water draining onto public highways from your property if the area exceeds the parameters allowed – specifically 5m². For further guidance, contact our customer service team who'll be delighted to help you.

See **brettlandscaping.co.uk** for more information

GeoCeramica® Bluestone

Beautiful, easy-to-install, GeoCeramica® Bluestone is an exciting range of porcelain paving purpose-designed for driveway applications.

Visually similar to granite, Bluestone has an elegant, densely speckled surface pattern to provide an impactful aesthetic for your driveway. Porcelain offers long-lasting beauty with its ease of maintenance, allowing the removal of tyre marking and oil stains, to retain a perfect finish.

- Single size packs
- 10mm product for indoors and detailing

GeoCeramica® Fiordi Grigio and Beta Silver Haze

Concrete block paving explained

Concrete blocks and setts have been the 'go-to' surface choice for paving, paths and driveways since they were first introduced. Mainly because of their ability and flexibility to create an almost infinite range of designs, but also because they are fully engineered blocks that, when laid correctly, are inherently strong and durable – perfect for heavy loads such as your family car or caravan.*

Concrete block paving has come a long way. A myriad of colours, a multitude of textures and easy to install, the humble concrete block is as stylish as it's ever been – delivering sensational results whether you require a contemporary or traditional finish the choice really is, yours.

And they're flexible enough to complement each other or other paving surface materials; porcelain, natural stone flags or gravel. Use them in your design to define paths, patios and driveways and for creating features such as planters, barbecue areas and steps. They also allow for easy sectional removal for repair and reinstatement using the original blocks without evidence of the repair.

*Please check with our Customer Service Team or your Brett Approved Installer that the product depth is suitable for your required application.

Alpha Silver Haze

Permeable Block Paving Explained

An important factor to consider when creating a driveway, is legislation regarding surface water run-off into the road outside your home. If a surface more than 5m² is to be covered or replaced, then you will need to apply for planning permission. Block paving can be used to capture the surface water that lands on it, but specially engineered permeable block paving has a much larger spacer nib than conventional blocks, enabling water to pass through to a water management system underneath.

Alpha

With a distressed, aged look that's in keeping with most surroundings, it isn't surprising that Alpha is one of our most popular paving styles.

The Alpha range is available in three single-size packs and a mixed-size TRIO pack. The TRIO pack contains three sizes of block in one pack, for maximum design flexibility. Available in 50mm and 60mm thicknesses to suit your project requirements.

And with the accompanying 50mm Alpha Circle Kit in our most popular colours, it's possible to create a wide range of designs. However, please be aware that due to the traditionally tumbled finish of Alpha Circles there may be some colour and texture differences when compared to standard Alpha paving.

- 50mm single size packs available in Autumn Gold, Charcoal & Silver Haze
- 60 and 80mm single size packs available in all colours
- 50 and 60mm TRIO mixed size packs
- 50mm circle packs in Autumn Gold, Charcoal and Silver Haze

BRETT APPROVED INSTALLERS (BAI)	92 - 93
GOOD TO KNOW	94 - 95

Thinking about colour

Choosing the colour that best suits your home, your garden and your taste is probably the most critical of the aesthetic decisions you'll make about your driveway or garden paving.

- Do you want to match the colour of your house, or create contrast?
- Do the colours of your patio need to pick up on the prevailing tones of your garden, other hard landscaped areas or out buildings?
- Do you need to consider different colours to create guidance? For instance, coloured edgings that delineate the boundary between one area and another, or a specific pathway that leads to your front door?
- Do you have larger areas that need to be broken up or have variegation added for visual impact?

Brett Landscaping has an incredibly diverse spectrum of colours across its natural stone, porcelain, concrete flag and concrete block paving – not to mention textures – that can be mixed and matched to suit any visual and practical requirement, large or small.

View our Colour Explaination Guide at brettlandscaping.co.uk/downloads

There's no substitute for looking at the 'real thing', and if you're investing in a new driveway or patio, it's an absolute must to make your final choices from real product samples. Samples can be ordered through your Brett Approved Installer or your local Brett stockist. Alternatively, why not ask your contractor if they've used the products you're interested in on a project nearby?

Understanding Paving Colours

Colours in paving act differently for many reasons, not least for the many different textures and variations – even within the same product. This is particularly significant with natural stone, which of course, is what gives it its high-end quality look and feel. It's for these reasons that it's crucial to view actual samples, to provide a true impression of how our products look and how the finished design is likely to turn out.

Get samples to be colour-sure

You can quickly and easily obtain a product sample in your desired colour from either your Brett Approved Installer or your local Brett Stockist.

Variations in colour are still possible across our product range due to a number of different factors:

- All concrete products are manufactured from a mixture of sand, cement, aggregate and pigment which can give variations in colour mix shades from batch to batch and site to site.
- Aesthetics account for a huge amount when making a porcelain decision. A good porcelain supplier such as Brett will be able to tell you exactly how many different surface aesthetics there are in a specific product. Depending on the style, the greater the number of variations, the better the look. Ensure the more exotic patterns have plenty of alternatives.
- Natural Stone products will vary in colour depending upon where it's quarried and how the stone is processed prior to delivery.

These variations are impossible to prevent, but do bring character, style and individuality. When you choose a colour from a photograph, there are many factors that can change how the product looks; the time of day the photograph was actually taken or climatic conditions, for example. These factors can affect how our product colours are viewed.

FIND YOUR LOCAL BRETT STOCKIST
BRETT APPROVED INSTALLERS (BAI)
GOOD TO KNOW

Find your local Brett Stockist

To ensure a seamless quality service, we only trust our products to be supplied through a national network of Builders' Merchants and retailers. With access to the full portfolio of our products, they can help you to make an informed product selection.

Visit **brettlandscaping.co.uk** to discover your nearest Brett stockist

Our website is also home to the Brett Information Hub, where you'll find everything from hints and tips on installation and maintenance, to technical product information and useful downloads.

And if you'd like to explore the design opportunities available with Brett products, follow us on Instagram, Facebook and Twitter, or view our Inspiration page.

Brett Approved Installers (BAI)

Providing you with that all-important peace of mind, our nationwide network of Brett Approved Installers (BAIs) is experienced in the craft of installing our products, and their workmanship is rigorously assessed and monitored, so you know your Brett driveway or patio will be installed to the highest standards.

All Brett Approved Installers have access to the latest technical and support services offered by Brett and so can easily help with product choice, design, logistics, British Standard queries and all other aspects of your project.

How do I find my Brett Approved Installer?

Simple. Scan the QR Code or Visit our **'Find an Installer'** page at **brettlandscaping.co.uk**, enter your postcode and search within your local area for the BAI that best meets your project needs.

BrettApproved
PAVING EXPERTS YOU CAN TRUST

5-year installation guarantee provided by your Brett Approved Installer

Your Brett Approved Installer will provide you with a 5-year Installation Guarantee on completion of the project. Your Approved Installer will also register your installation and product details directly onto our website for you to verify.

10-year product guarantee provided by Brett

Once your BAI has submitted your project information, we'll automatically send you a personalised email with log-in details to access the guarantee portal on our website.

Simply verify the Brett products installed, privately rate the service you've received from your Brett Approved Installer and download your 10-Year Product Guarantee direct from Brett Landscaping for the Brett products installed at your home.

Installer of the Year

Each year, Brett's Approved Installers are invited to submit a portfolio of their work from the previous 12 months, with the hope of being selected as the Brett National Installer of the Year. 2020 saw The Secret Garden Landscapes & Design take home the award.

Selected by Brett's judging panel of landscaping experts from a highly impressive range of entries, The Secret Garden's high standards, quality workmanship and level of customer care set them apart from the competition.

Riven Sandstone Fossil Mint installed by The Secret Garden

"On average, our Brett Approved Installers have a 97% overall Customer Satisfaction Rate"

Eclipse Lunar installed by A.L.S Landscaping

"Every customer I work with is unique. I listen to what they want and by using my industry experience and design flexibility I can assure them a quality installation and help turn their dream into a reality."

– **Addam Smith,** A.L.S Landscaping
Newcomer of the Year Award Winner 2020

PRODUCT INFORMATION
FIND YOUR LOCAL BRETT STOCKIST
BRETT APPROVED INSTALLERS (BAI)
GOOD TO KNOW

Good to know

We're always looking for new ways to improve our products and services, so you'll always get the very best. From time to time, these improvements might alter our products' characteristics (weight, dimensions, shades, pack size etc.) and these changes may occur without notice.

For the latest product information including weights and dimensions, please get in touch to request the relevant technical data sheets or visit **brettlandscaping.co.uk**.

Although we've taken every care possible to make sure our colour swatches are accurate, differences may occur due to printing processes and variations between manufacturing batches. For a true representation we recommend that you request a product sample, allowing you to get hands on with your choice of paving.

For all hard landscaping activities, we recommend the production of comprehensive risk assessment and method statements to ensure safe, sustainable and legal working practices are followed at all times.

Product Applications and Suitability

All of our products are manufactured in accordance with the relevant manufacturing standards. This ensures that they can be subject to design, installation and maintenance in accordance with the relevant standard from the BS 7533 suite of standards, as appropriate.

Products featured in our 'Gardens & Drives' brochure are intended only for use in domestic applications.

Specific information relating to product applications is available from **brettlandscaping.co.uk**, where you can access a wealth of information including our technical data sheets (TDS), CE Marking and/or Declaration of Performance (DoP) certificate as well as NBS clauses and BIM objects. We recommend any considerations relating to planning consents and permissions are satisfied.

To help you get the most from your project, the Brett team is on hand to suggest and advise on suitable product(s) for different applications and provide guidance for a successful installation.

Ordering

Selected your Brett product(s)? It's easy to place your order, just contact your nearest Brett stockist. You can find their details on **brettlandscaping.co.uk/where-to-buy** or you can contact us on **0345 60 80 570** and we'll point you in the right direction.

For the most consistent products possible, we recommend that:

- Where a stockist has provided samples, you use the same stockist for ordering the final product(s).
- All of your products are sourced from the same batch, or immediate adjacent batches.
- For larger orders a schedule will be required to successfully manage your orders.
- The total quantity required should be ordered and delivered at the same time to minimise the chance of product variation.

In general, it's best to allow for 5% wastage. However, where a project or design requires larger amounts of cutting (for instance when creating a tight, twisting pathway rather than an open plaza area) this may increase the amount of product wastage.

When making any direct-to-site orders, please let us know of any constraints, hazards or special considerations that might need to be made prior to delivery. If you need any assistance calculating quantities, please call our Customer Services Team on **0345 60 80 570**.

Delivery and installation

We take every possible care with your order, but please check that it is in a satisfactory condition on delivery. In the unlikely event you have any issues with your order, please contact your stockist immediately with the product and batch code that are printed on the packaging and explain your concerns to them.

For the best colour and jointing-line consistency, we recommend:

- Mixing from at least three different packs as work progresses.
- Taking product 'slice-by-slice'/vertically from each pack wherever possible.
- Using string lines.

Following these guidelines will help distribute any minor variations over a larger area, giving you a visually consistent aesthetic over the entire project. However, please note that some variation can still occur between individual products – especially with multi-coloured and natural stone products. These features are to be expected and enhance the character and aesthetic of the completed installation.

If you have any concerns about the installation of our products, please contact our Customer Services Team on **0345 60 80 570** before work starts. Our team is here to help you get the best from your products. If you or your installer go ahead with installation despite your concern, this may be considered as acceptance of the product and unfortunately, may prejudice future responsibility for costs incurred stemming from remedial works.

Early life and maintenance

Once your paving has been installed, you may notice some changes to its appearance in the first days and weeks. These visual changes can be due to a number of issues originating from the concrete and/or the manufacturing process.

Many of these changes will simply weather away, including:

- Efflorescence: The ongoing chemical reaction within the concrete which provides its strength can produce calcium carbonate (a white powdery residue) which may appear on the surface of products. This temporarily lightens the product but will typically weather away without reoccurrence.
- Porosity: Occasionally, individual blocks may appear damp and take longer to dry than others when installed. As the hydration continues, the capillaries within the concrete will gradually close and the product will dry to the same colour as others.
- Aged and distressed products: For certain products, we distress the edges to offer an aged appearance and enhance the character of the paving. A dusty residue can be left on the blocks. This will weather away.
- Differential curing: Dark patches occasionally appear on the surface of garden products. This may be differential curing and is caused by varying moisture levels within the flag drying at different rates. Like efflorescence, given time and the natural weathering process, these patches will become less visible.
- Aggregate contaminants: Very rarely concrete may contain Iron Pyrites and/or Lignite. These are both the result of naturally occurring constituents within the product raw materials which may result in localised discolouration of the surface of an individual unit. The phenomenon will not normally affect the performance of the product.

In the unlikely event of any other concerns, please contact our Customer Services Team on **0345 60 80 570**. All pavements should be cleaned and maintained periodically. How often this need to be carried out depends on the extent to which the product is exposed to soiling from the surrounding environment and what is deemed to be acceptable for the paving's final application.

For more information, please see the 'Essential Maintenance Guide' at **brettlandscaping.co.uk**.

Occasionally, sealants may be used to aid the longevity and appearance of the paving. If you are considering using a sealant, we recommend that you contact the manufacturer/supplier to fully understand their product. We suggest care is taken when choosing these products and that you consider:

- That the slip/skid characteristics of the paving are not adversely affected.
- Whether this will result in a wet, glossy or matt finish.
- The need for any future re-application/maintenance.
- Any health and safety requirements for application and ventilation.

Finally, before application, we suggest that you make sure you are satisfied with the cleanliness and aesthetics of the paving, so that unwanted dirt and detritus do not become trapped once sealed. The ability of the product to weather may be influenced by the presence of a sealer.
