Product Information

Brett Zeta Lock is a 16 sided block paving that has been specifically designed to provide the greatest interlock between blocks to give the maximum rigidity.

Brett Zeta Lock is designed for heavy duty pavements where traffic loading is the key criteria. Therefore it is ideal for applications such as ports, container yards and airports.

Brett Zeta Lock has a purpose made Closure Pack accessory for abutting the pavement to a straight edge. It is also available in both single size and machine lay pack formations.
For more information on how to use the Closure Pack please refer to the Brett Zeta Lock 'Installation Guidelines' document.

Brett Zeta Lock pavements should be designed and constructed in accordance with the requirements of BS 7533.
