|----------------|--------------------------------------|
| <b>PROJECT</b> | Congleton Leisure Centre             |
| <b>CLIENT</b>  | Pulse Design & Build                 |
| <b>PRODUCT</b> | Invicta TRIO Moonstone, Onyx & Pearl |

Brett Landscaping, a leading supplier of paving products, has been selected to provide its Invicta block paving in colours Moonstone, Onyx, and Pearl for the refurbishment of Congleton Leisure Centre.

The project involves demolishing the legacy pool and hall to make way for two new swimming pools, a thermal suite, a modern gym, state-of-the-art fitness equipment, exercise and refreshment facilities.

Brett was able to provide 305 m2 of Invicta Trio in each of the three colours – Moonstone, Onyx, and Pearl – as well as an additional 20 m2 of mixed size paving in 80mm of each colour for the project. By combining these colours, the client was able to create an eye-catching, mix n match design leading up to the Leisure Centre entrance.

Brett's Invicta block paving products were able to solve several challenges faced by the project, including the need for a suitable product that was readily available and competitively priced. With Brett's help, the paving contractor was able to source the required paving products without any delays, ensuring that the project was completed on time and within budget.

Commenting on the project, Mark Barter, the Head of Commercial Sales for Brett Landscaping said:

**“We are delighted to have been selected to provide our Invicta block paving products for the Congleton Leisure Centre project. Our products are designed to meet the highest standards of quality and durability, and we are confident that they will provide a long-lasting and attractive surface for the centre’s visitors.”**

The Congleton Leisure Centre project is one of many successful projects that Brett Landscaping has been involved in. With a wide range of paving products and services available, the company is well-equipped to meet the needs of any project.
