

# CPD SEMINAR

## SuDS and the Role of Permeable Paving

This 45 minute presentation provides guidance as to why concrete block paving should be considered as a source control for Sustainable Drainage Systems (SuDS) along with the legislative drivers and how compliant systems can be designed to BS 7533-103: 2026.

### Key Learning Objectives:

- An understanding of why Sustainable Drainage Systems (SuDS) are required.
- A review of Central Government and Local Authority policy and the key drivers behind SuDS.
- Clarification of what SuDS are, the management train and how concrete block permeable pavements work and integrate with the management train.
- An understanding of both the design and construction of concrete block permeable pavements to BS 7533-103: 2026
- Awareness of the compliant materials used in the construction of concrete block permeable pavements
- An overview of the maintenance of permeable pavements to maximise their structural and hydraulic performance.

### The RIBA Core Curriculum topic areas covered:

- Architecture for social purpose
- Legal, regulatory & statutory compliance
- Sustainable architecture
- Places, planning & communities
- Design, construction & technology

## What can we do for you

Brett Landscaping are one of the UK's leading manufacturers of high quality paving products, with an offer that includes concrete block paving, concrete garden paving, permeable paving and specialist kerb systems, as well as ethically sourced natural stone and porcelain. All of our products are supported by a comprehensive technical and design service which has the flexibility to accommodate commercial, public sector and domestic projects.

We work hard to share our expert knowledge about paving with architects, engineers and designers helping you to achieve the best looking, most durable and cost effective paving solutions for your projects.
