

Making beautiful simple

brettlandscaping.co.uk

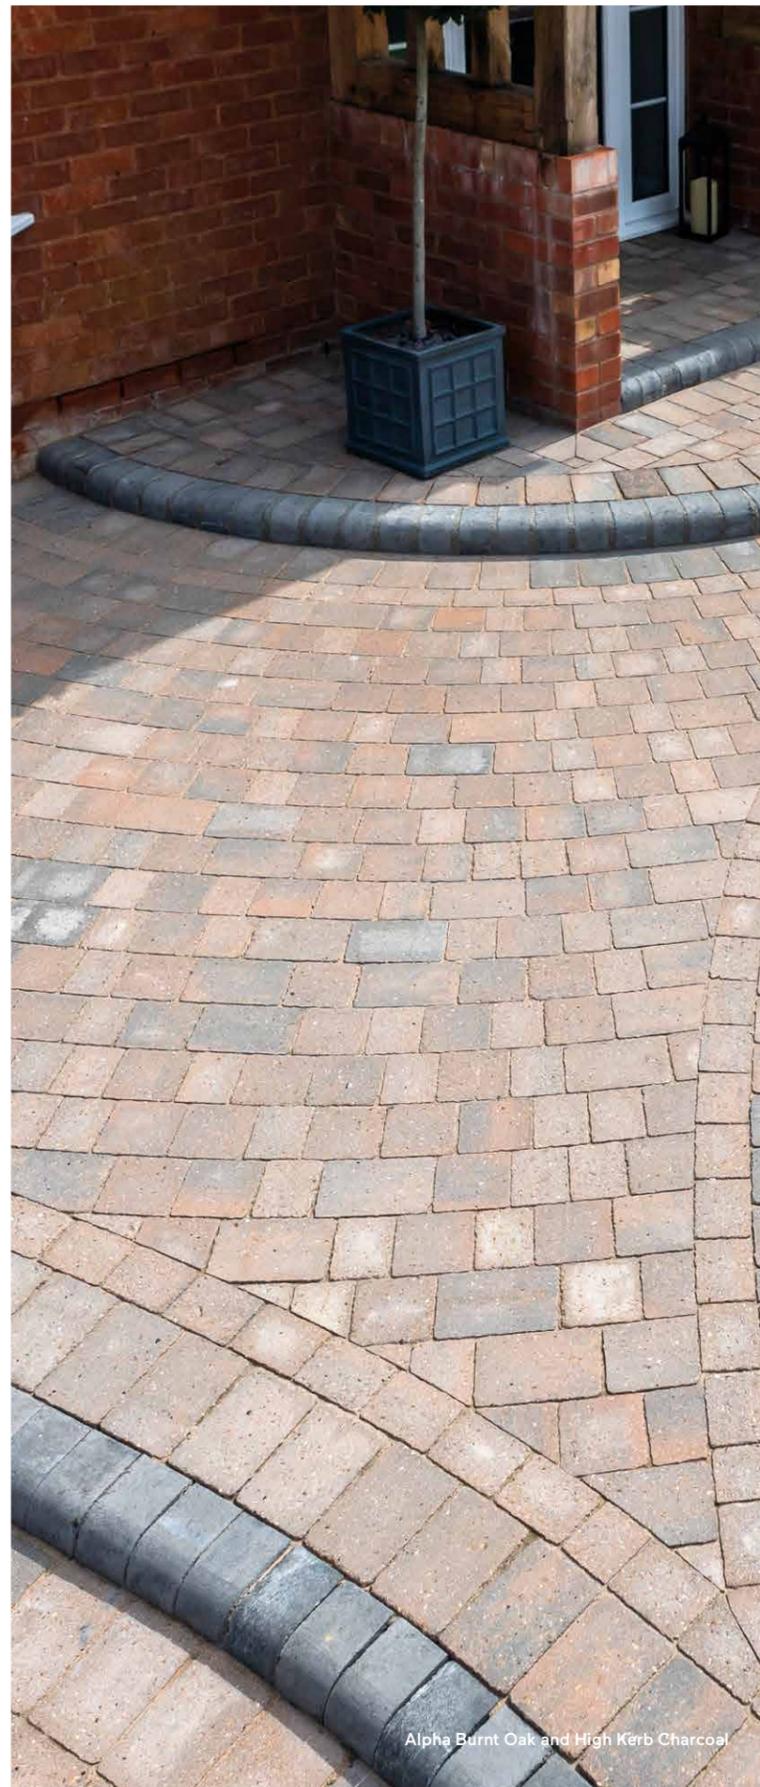

Welcome to Brett Landscaping

At Brett, we are modern in our thinking. We're a trusted and established independent business, anticipating your project requirements, being proactive and have integrity in everything we do. We don't just manufacture products, we help create outside experiences. And our priority is to do it responsibly, sourcing materials from sustainable resources, whilst also being compliant with the most current legislation on sustainability and the impact on the environment.

It's a time of great change; our built environments, including suburban developments, need clever thinking to enable planning authorisation, which can affect designs and aspirations, such as important consideration towards surface water run-off and consequential flooding challenges. Which is why our Customer Service teams, Technical Support teams and Sales teams are fully trained to offer the advice you need for a successful project – from beginning to end.

We believe in delivering what we say – every time; to promote outside experiences and infinite possibilities. Brett makes it all simple to be where you want to be.

Brett. Built on relationships.

Alpha Burnt Oak and High Kerb Charcoal

“Walkers The Builders Merchant Ltd. are 40 years in business this year and Brett have been our preferred supplier of block paving for as long as we can remember!”

Paul Alford, Buyer at Walkers The Builders Merchant Ltd.

Built on relationships

With Brett, everything is made that little bit easier, a little bit more exciting – and with a straightforward attitude. We are a trusted and established independent business; one of the UK's leading providers of construction and landscaping materials, in fact. We make it a priority to understand our customers; domestic and commercial, and through innovation, collaboration, knowledge and support. Our expertise and technical capabilities together with a commitment to investing in new technologies and design, enable us to help our customers create the finest, most beautiful, inspirational outdoor spaces. And our products are manufactured from high-quality concrete, porcelain or ethically sourced natural stone, including block paving, paving slabs, kerb systems and permeable chippings.

Simply, 'what can we do for you', sounds much better than 'what we do'. It's a philosophy that's built our business. A business built on relationships.

Our Markets, Our Relationships

Domestic

With the increasing interest in gardening programmes, home renovation and self-build projects, the UK residential landscaping sector continues to prove one of the UK's favourite pastimes. The ornamental horticulture and landscaping market in the UK made an estimated £24.2 billion contribution to national GDP in 2017 – and contributing to around 568,700 jobs across the country; equivalent to 1 in every 62 jobs.¹

1. Garden Industry Statistics from the Horticultural Trades Association. hta.org.uk

Commercial

As new developments, both residential and commercial, become more commonplace; and with the drive to push greener, more sustainable and better designed urban landscapes, it's important the products used are compliant and suitable as well as exciting and beautiful. With today's construction regulations, planning challenges and directives around wellbeing, we'll work with you from the very beginning of your project to ensure a straightforward process; from your design, through to BIM modelling support, building regulations and the most suitable way to lay our products.

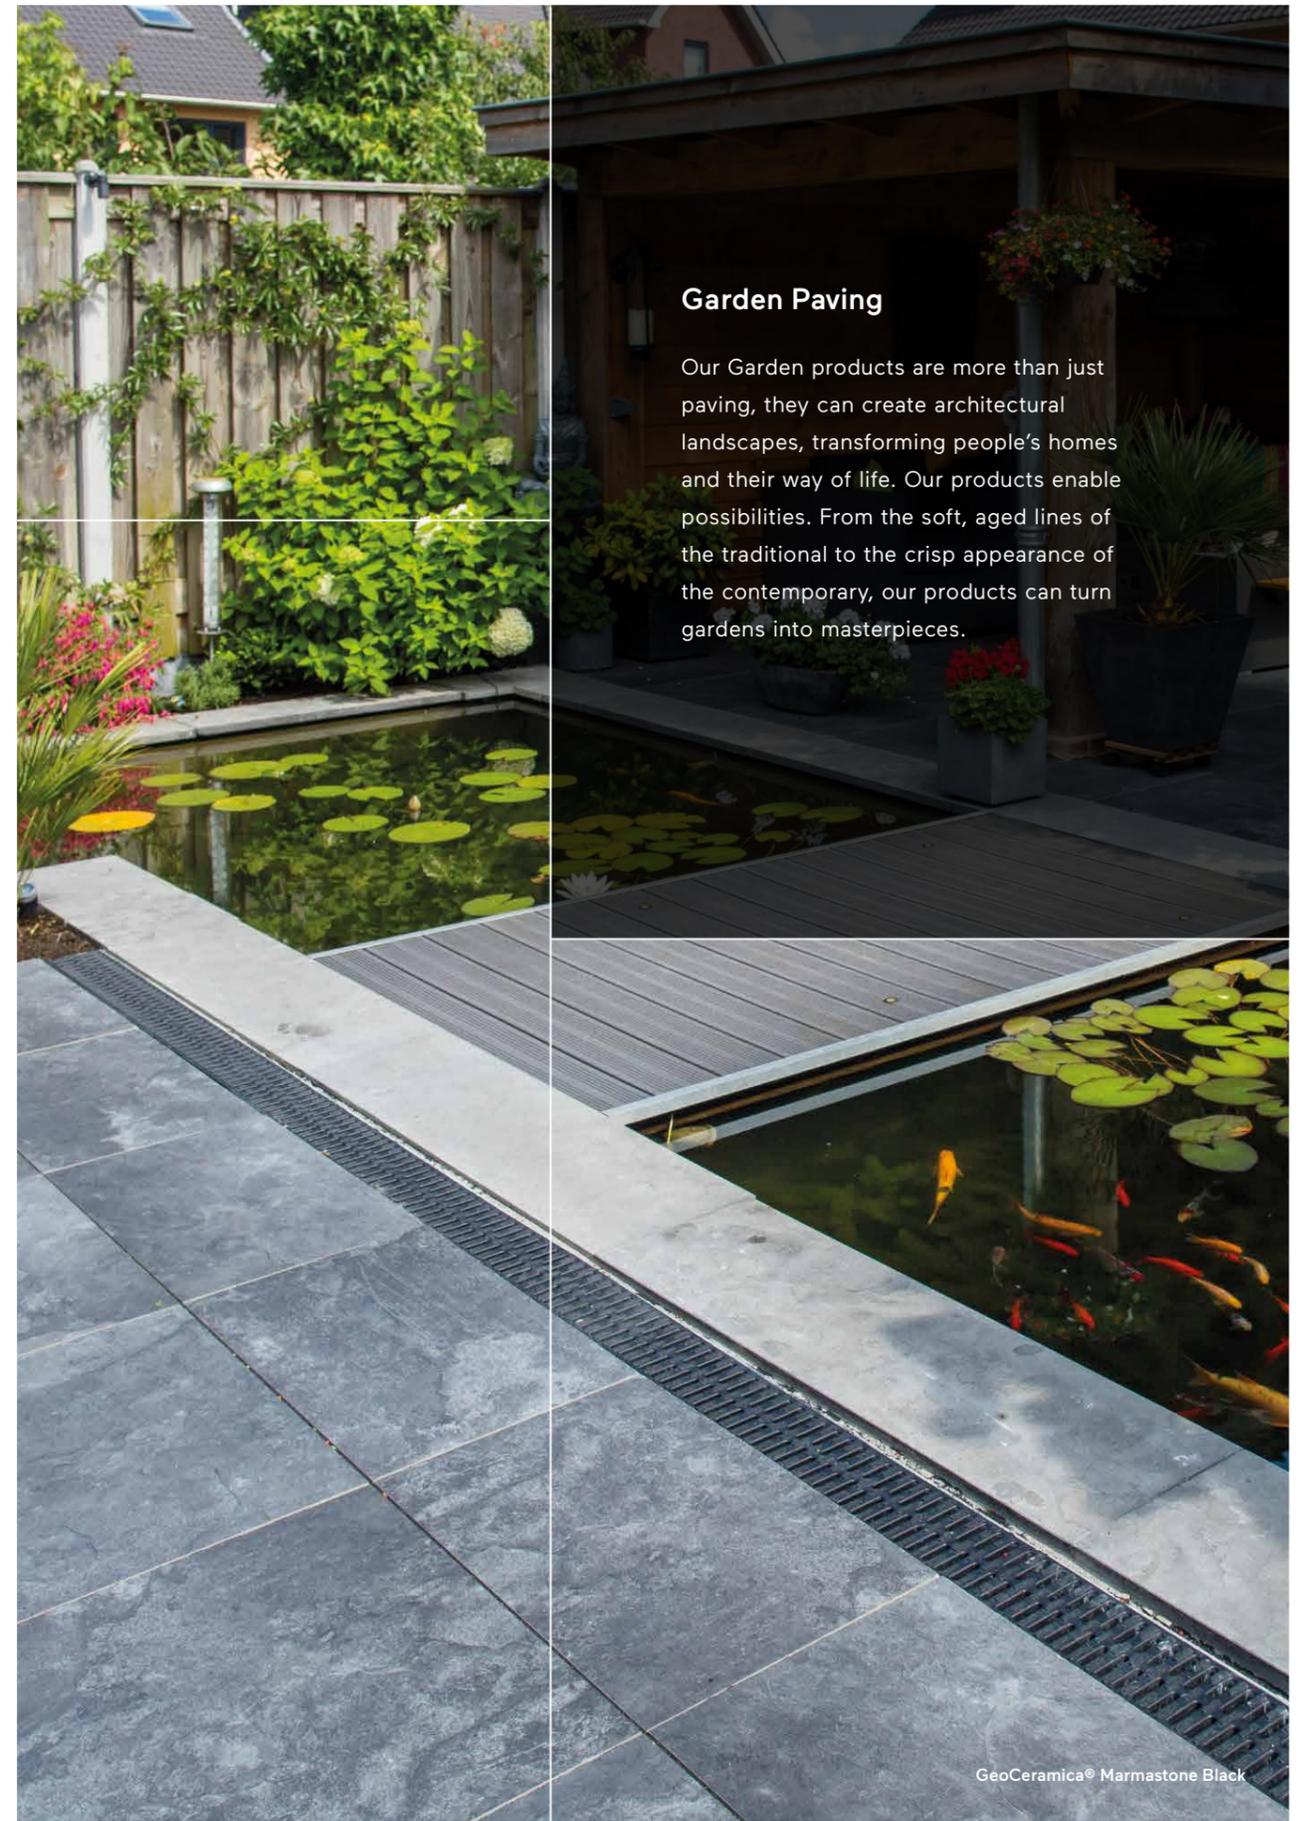

GeoCeramica® Mosaik Grigio

Product sectors

For our audiences; Architects, Landscape Architects and Developers to Contractors and Homeowners, the Brett Landscaping range of products have been the 'go-to' outside space solutions. And they've been developed to satisfy a catalogue of applications, to create inspiring surroundings whilst helping towards environmental integrity.

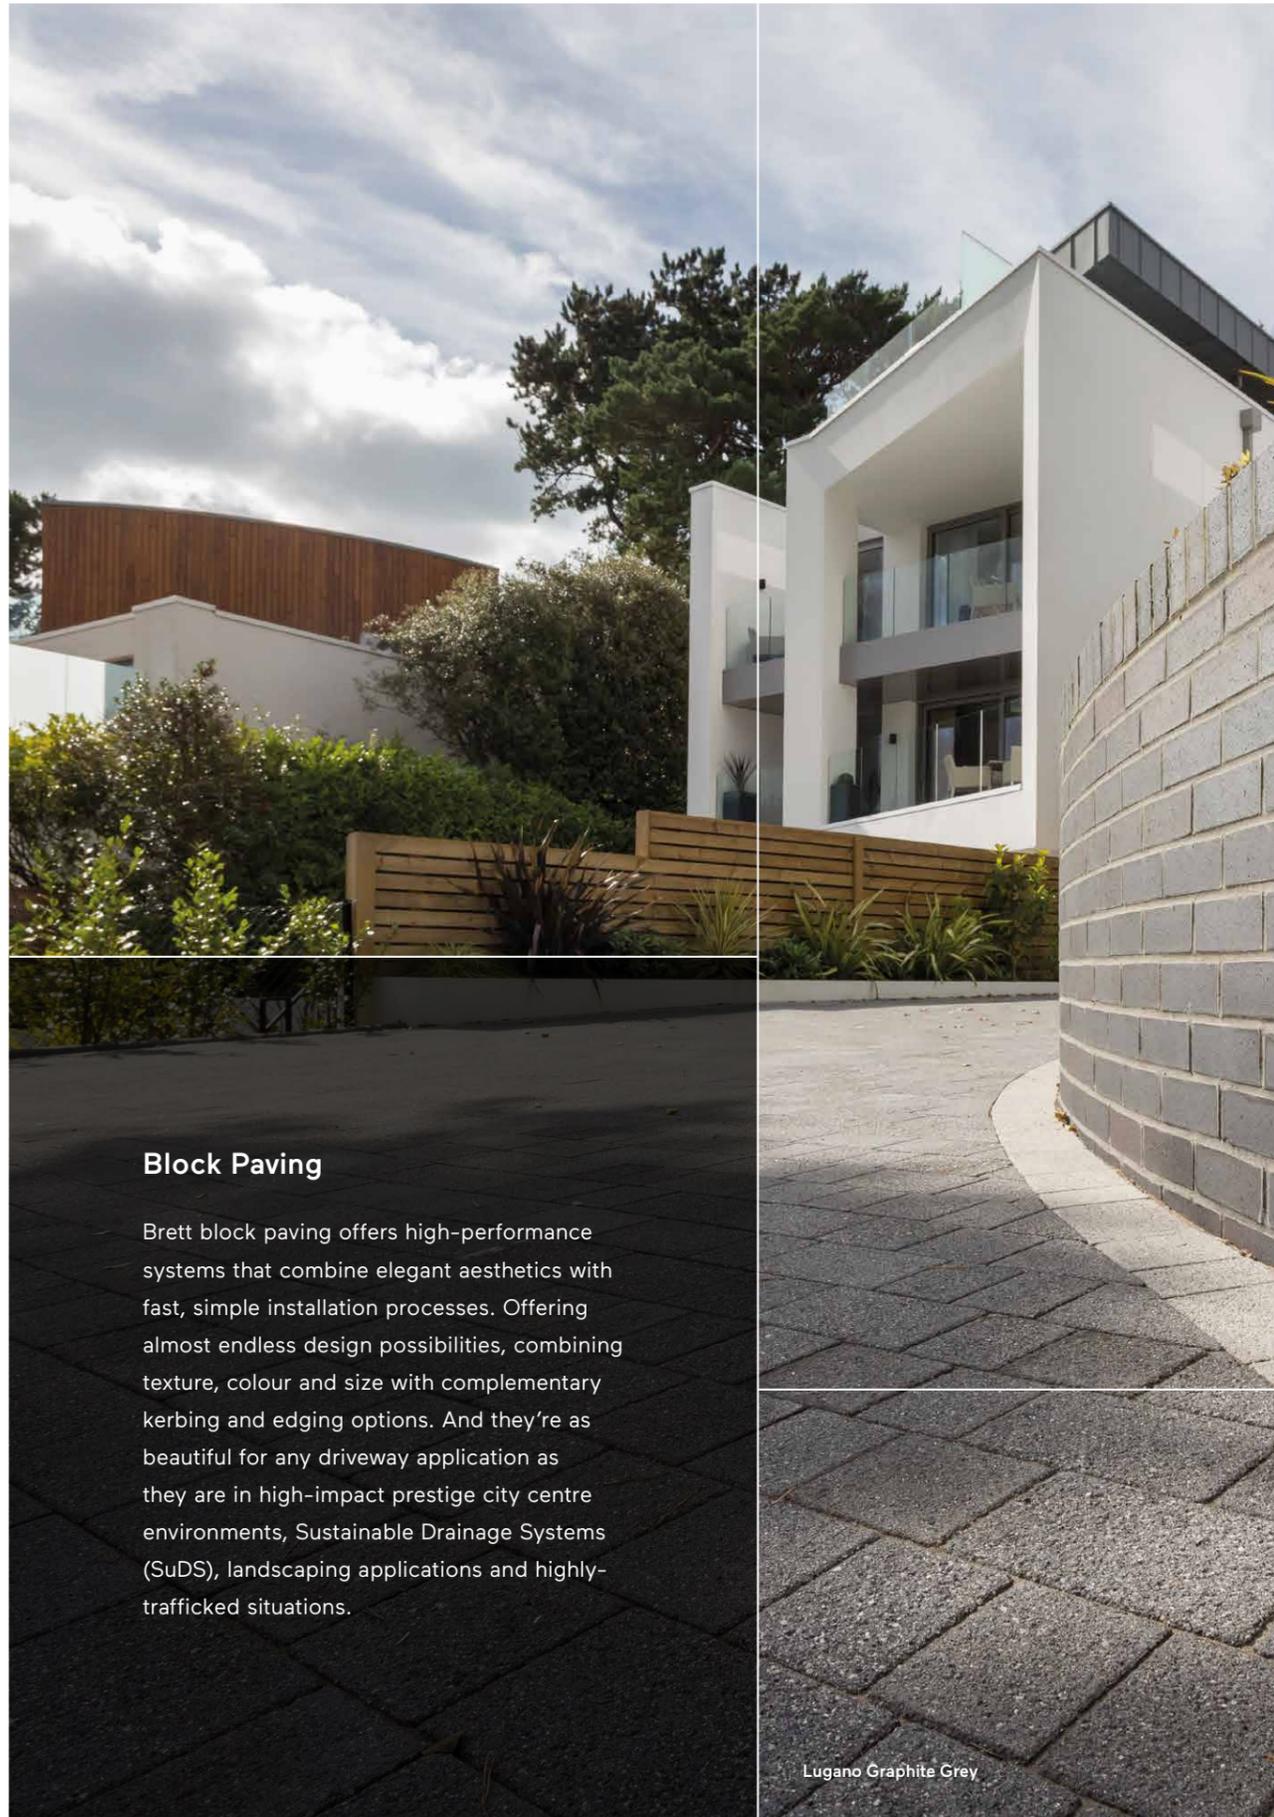

Elegante Granite Platinum Grey

Garden Paving

Our Garden products are more than just paving, they can create architectural landscapes, transforming people's homes and their way of life. Our products enable possibilities. From the soft, aged lines of the traditional to the crisp appearance of the contemporary, our products can turn gardens into masterpieces.

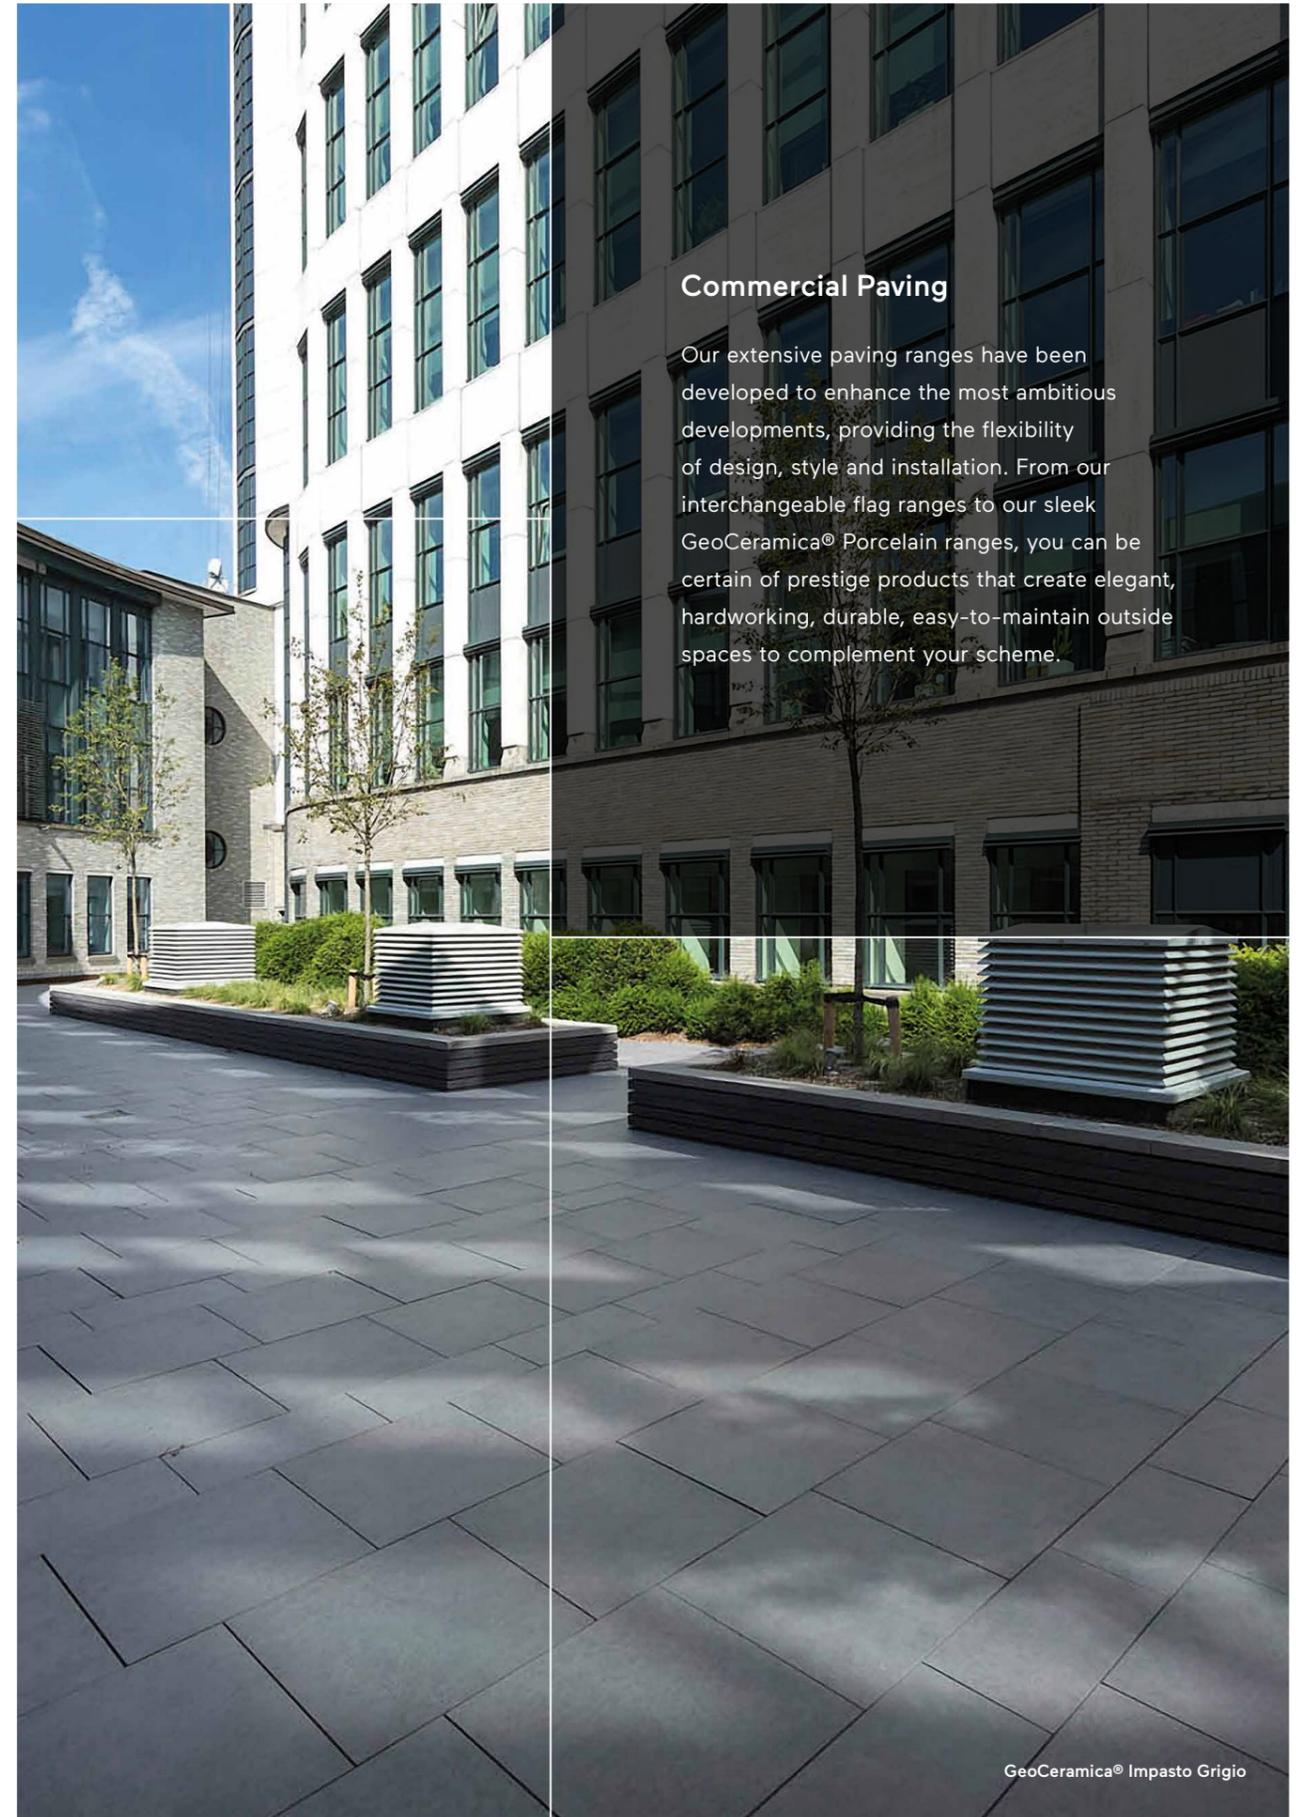

GeoCeramica® Marmastone Black

Block Paving

Brett block paving offers high-performance systems that combine elegant aesthetics with fast, simple installation processes. Offering almost endless design possibilities, combining texture, colour and size with complementary kerbing and edging options. And they're as beautiful for any driveway application as they are in high-impact prestige city centre environments, Sustainable Drainage Systems (SuDS), landscaping applications and highly-trafficked situations.

Lugano Graphite Grey

Commercial Paving

Our extensive paving ranges have been developed to enhance the most ambitious developments, providing the flexibility of design, style and installation. From our interchangeable flag ranges to our sleek GeoCeramica® Porcelain ranges, you can be certain of prestige products that create elegant, hardworking, durable, easy-to-maintain outside spaces to complement your scheme.

GeoCeramica® Impasto Grigio

Kerbs & Channels

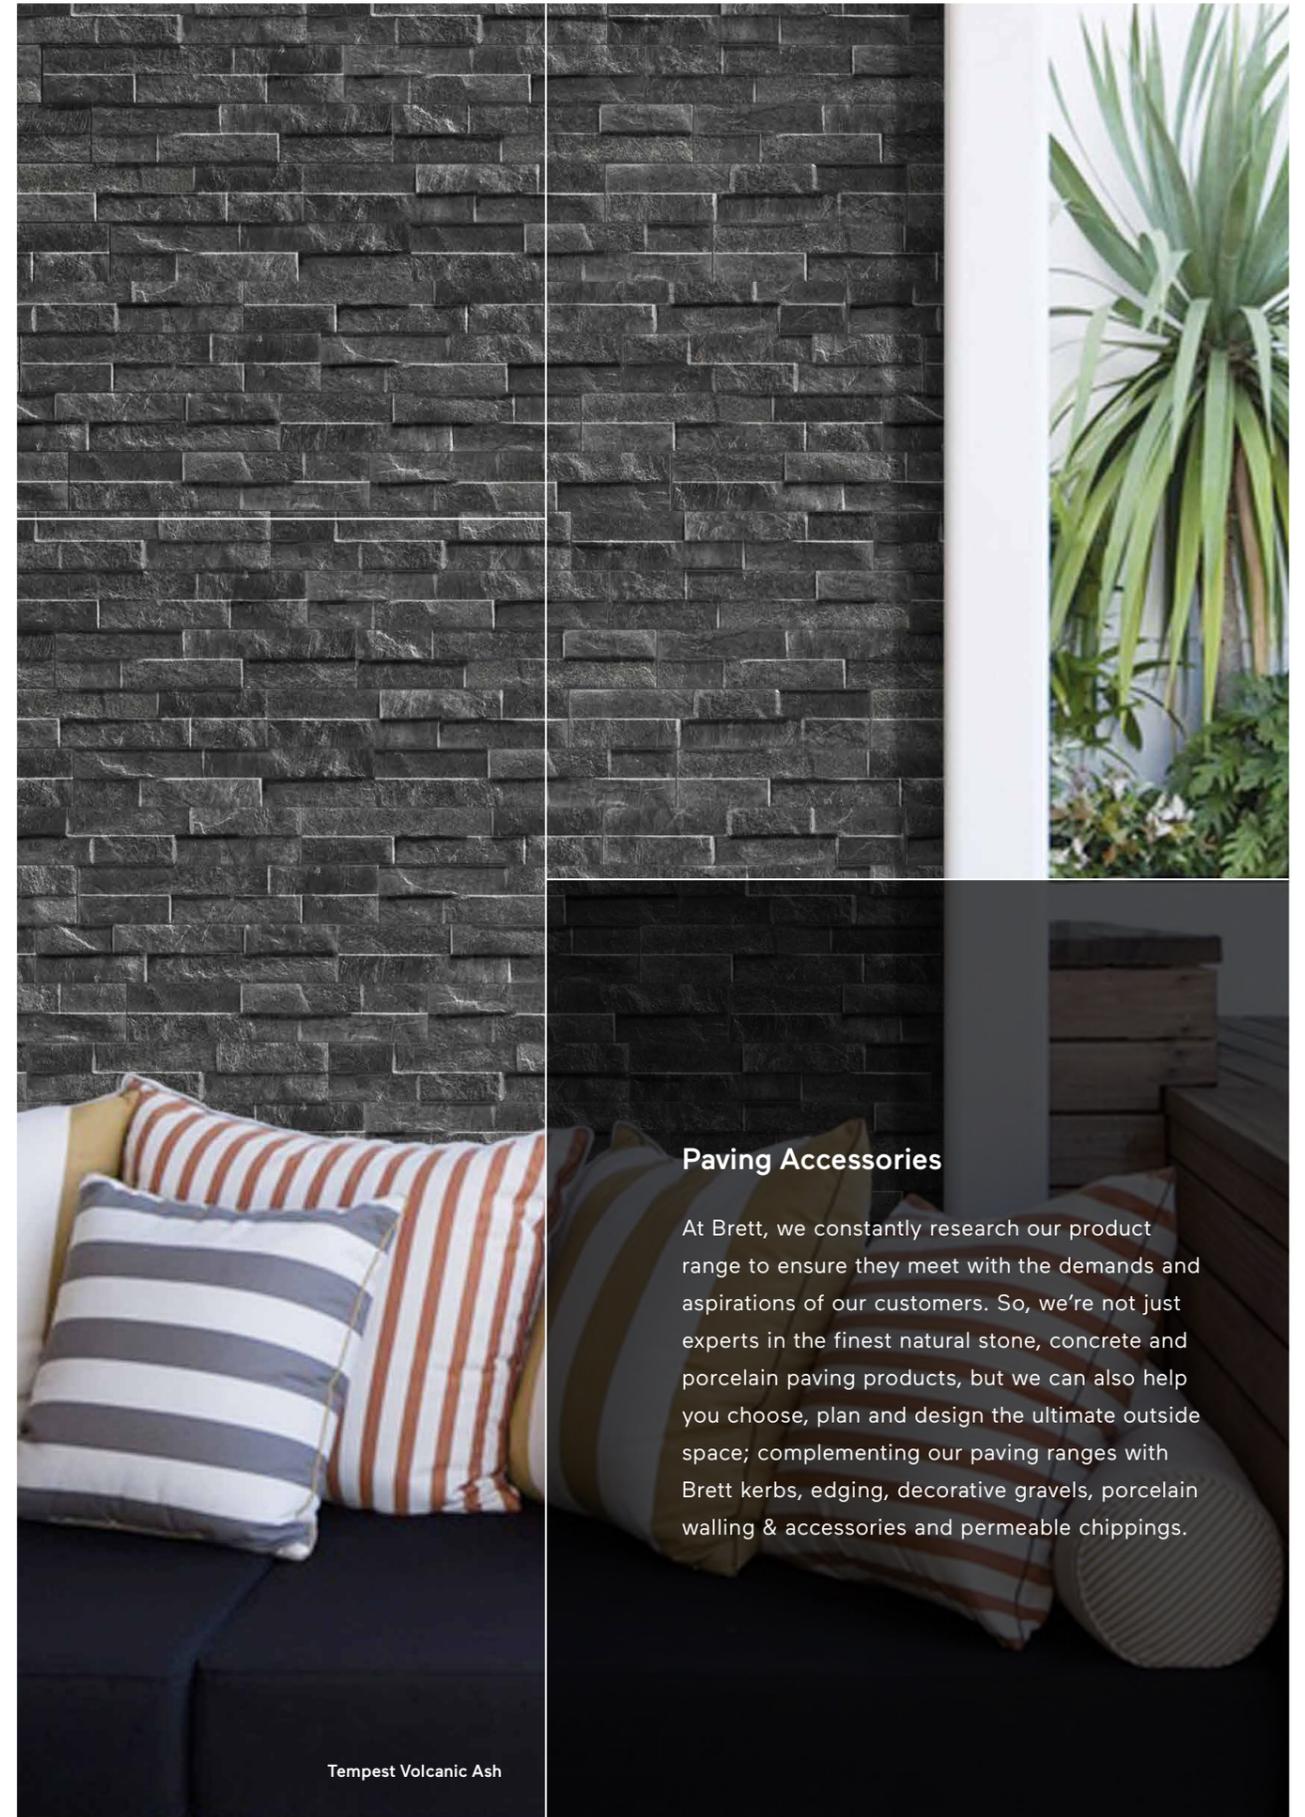

Our complementary ranges of kerbs and channels not only deliver a striking design addition to any paving project, but are important water management components that, using longitudinal gradients within the footpath's design, direct surface water run-off to a suitable drainage point, into natural soakaways or engineered SuDS. With our commitment to sustainability, and to achieve a more decorative finish, especially within the residential market, our range of Meltone and Yorktone kerbs complement our more traditional paving products for that perfect look. Domestic kerbs include Alpha & Drivestyle Kerbs, High Kerb and Omega Kerb, which has been developed with a 200mm length enabling fewer units to be used to create borders and boundaries, saving installation time whilst offering excellent value.

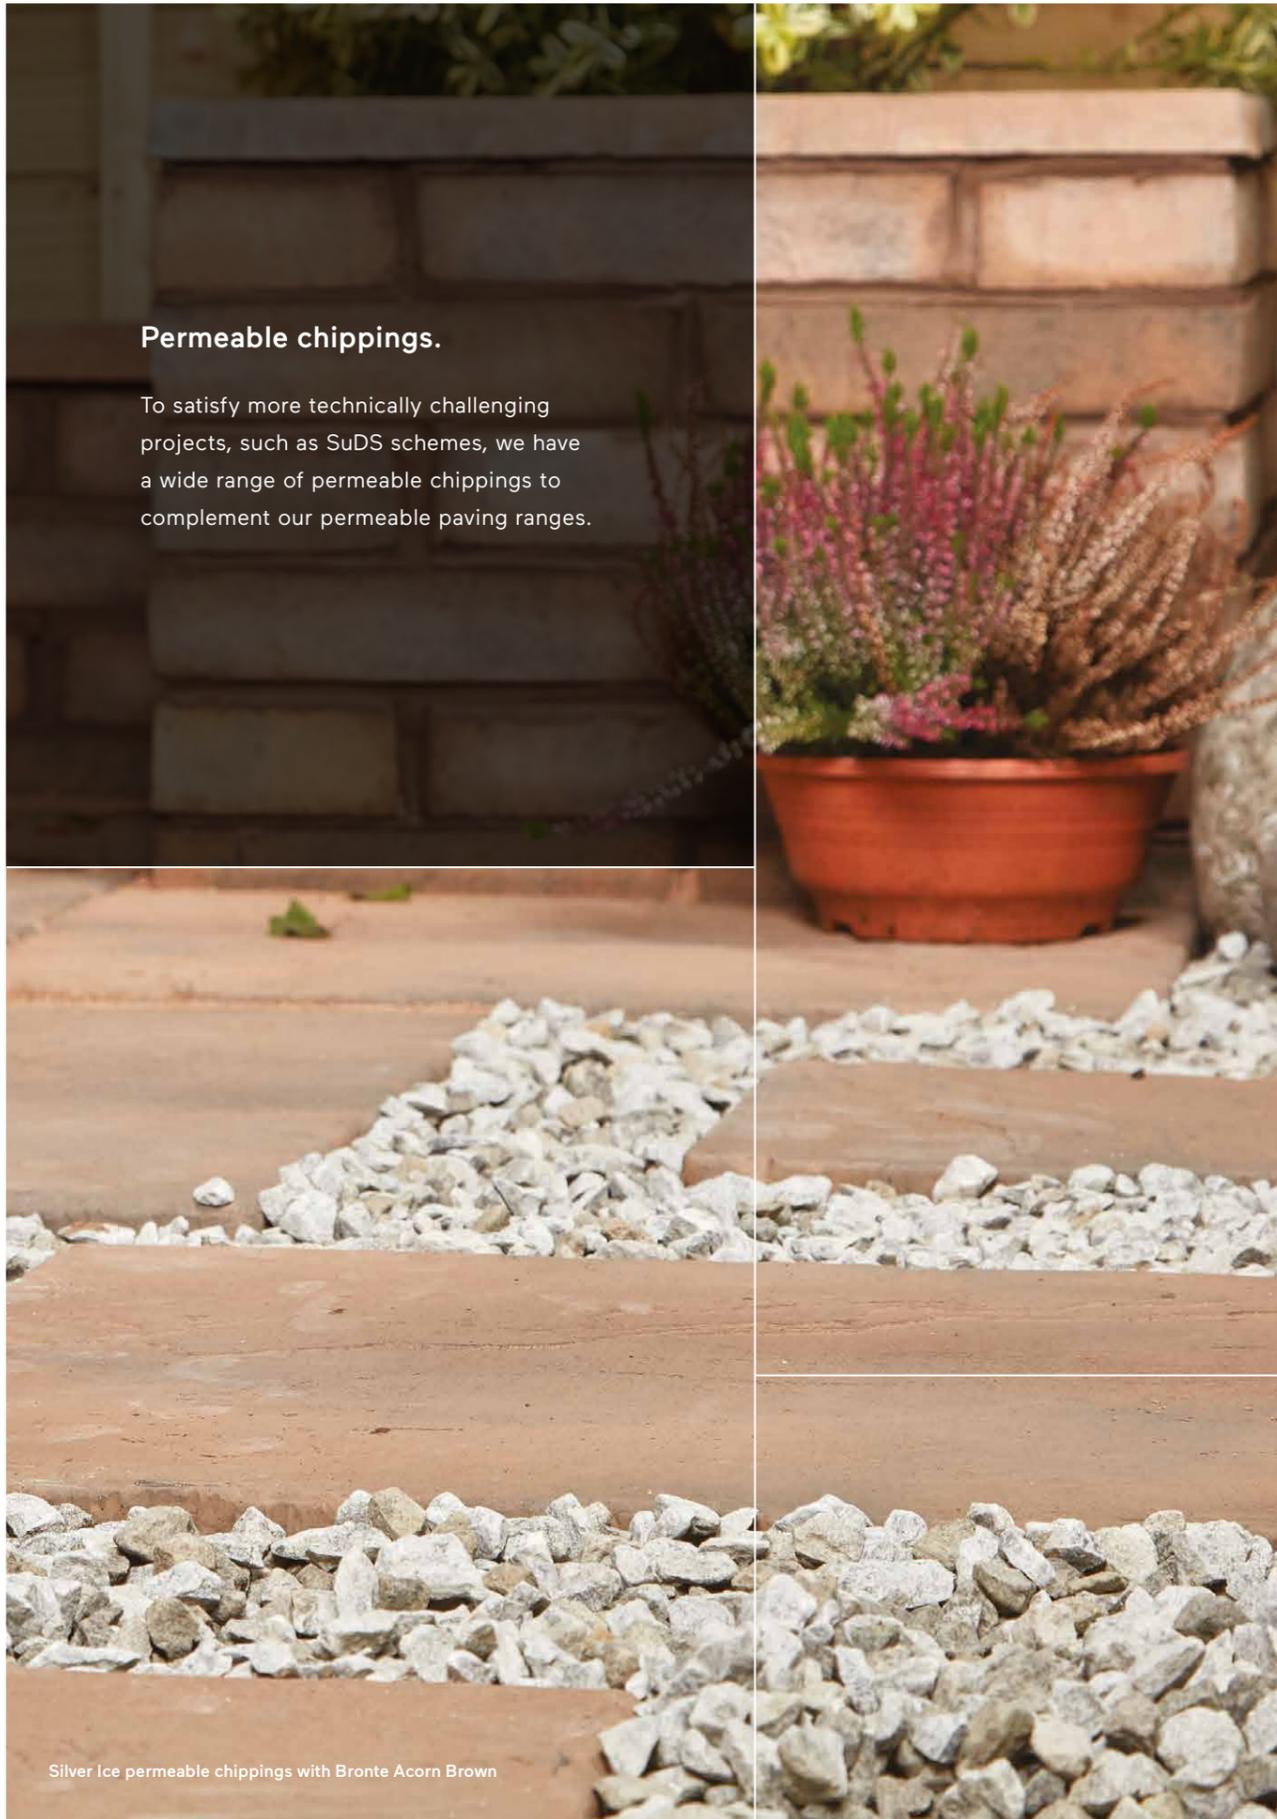

Mobility Kerb Charcoal and Alpha Burnt Oak

Paving Accessories

At Brett, we constantly research our product range to ensure they meet with the demands and aspirations of our customers. So, we're not just experts in the finest natural stone, concrete and porcelain paving products, but we can also help you choose, plan and design the ultimate outside space; complementing our paving ranges with Brett kerbs, edging, decorative gravels, porcelain walling & accessories and permeable chippings.

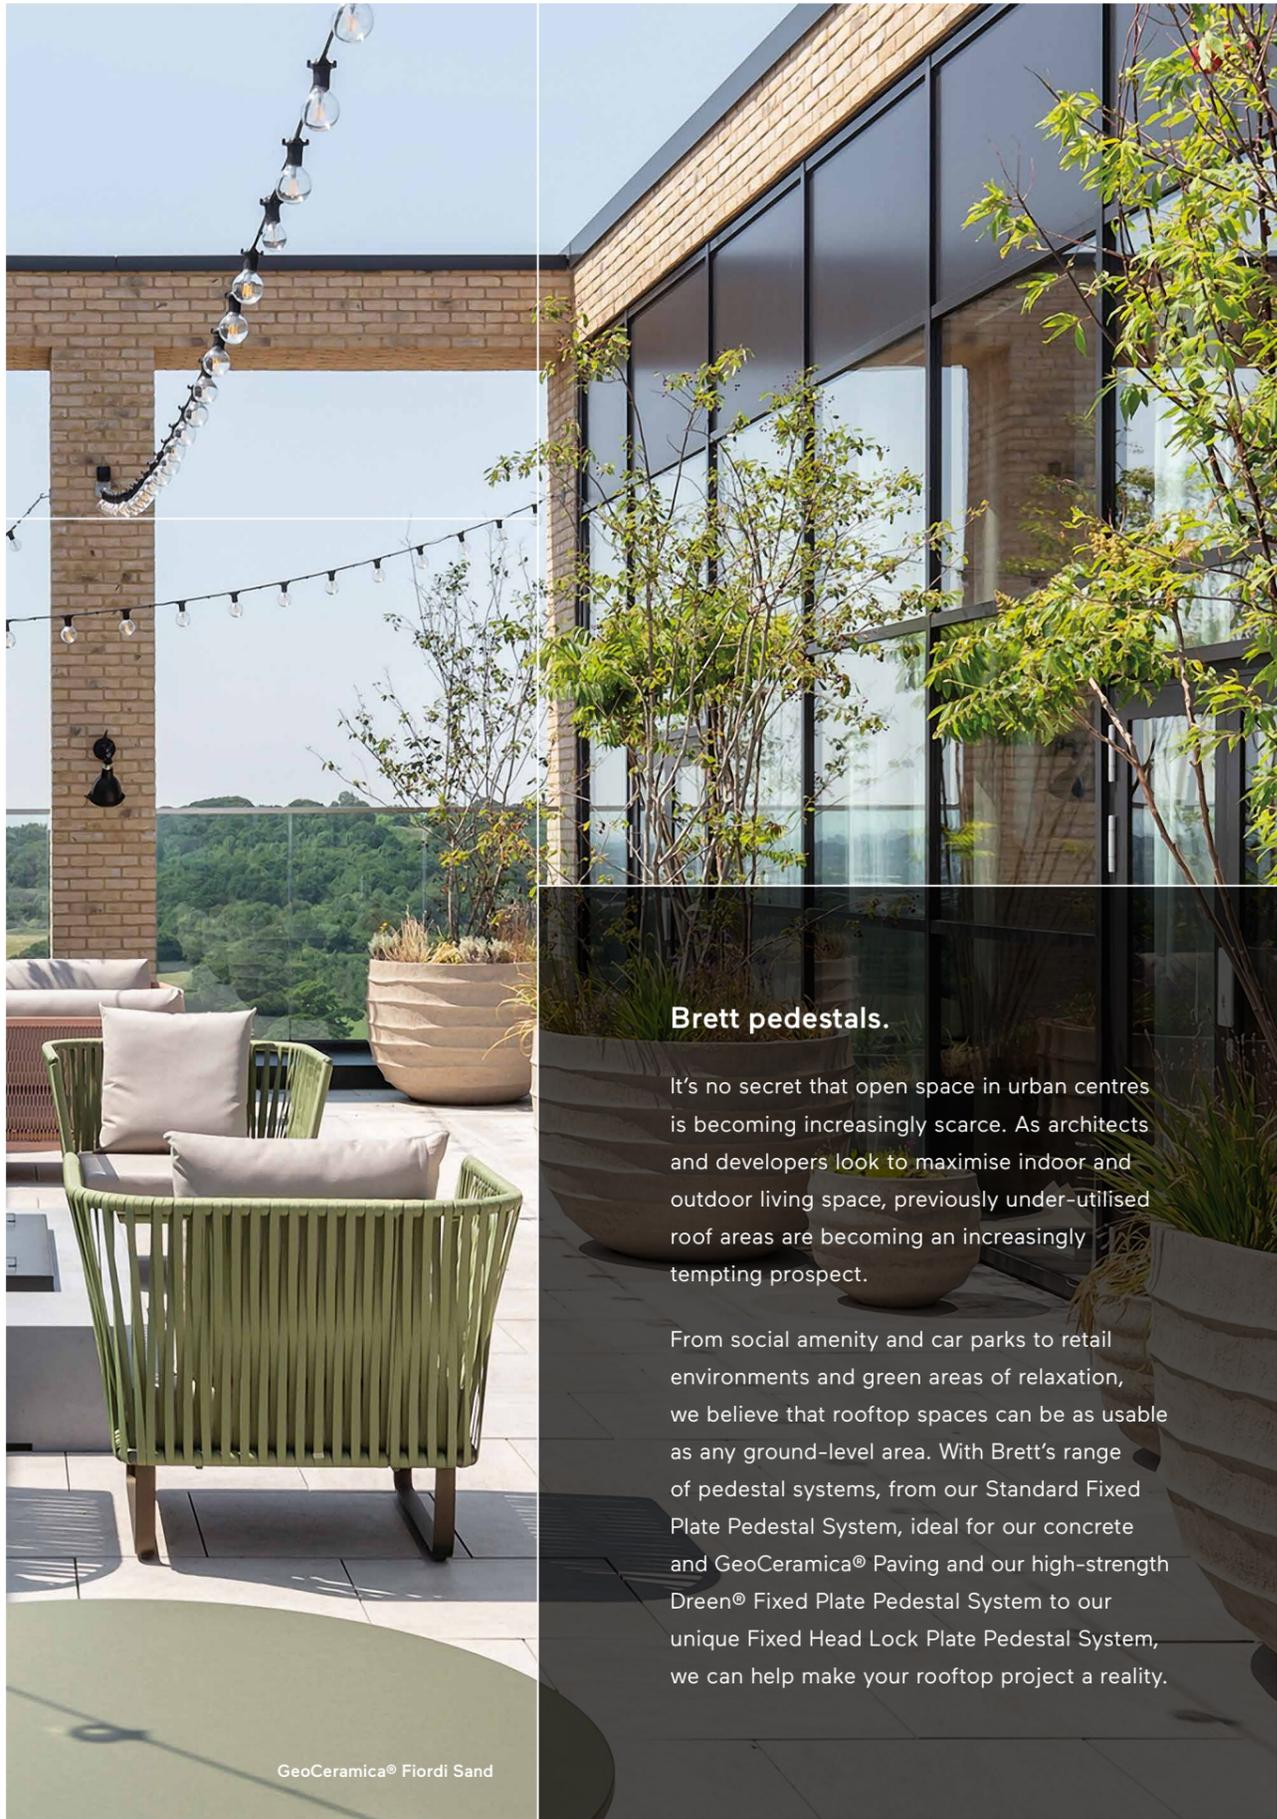

Tempest Volcanic Ash

Permeable chippings.

To satisfy more technically challenging projects, such as SuDS schemes, we have a wide range of permeable chippings to complement our permeable paving ranges.

Silver Ice permeable chippings with Bronte Acorn Brown

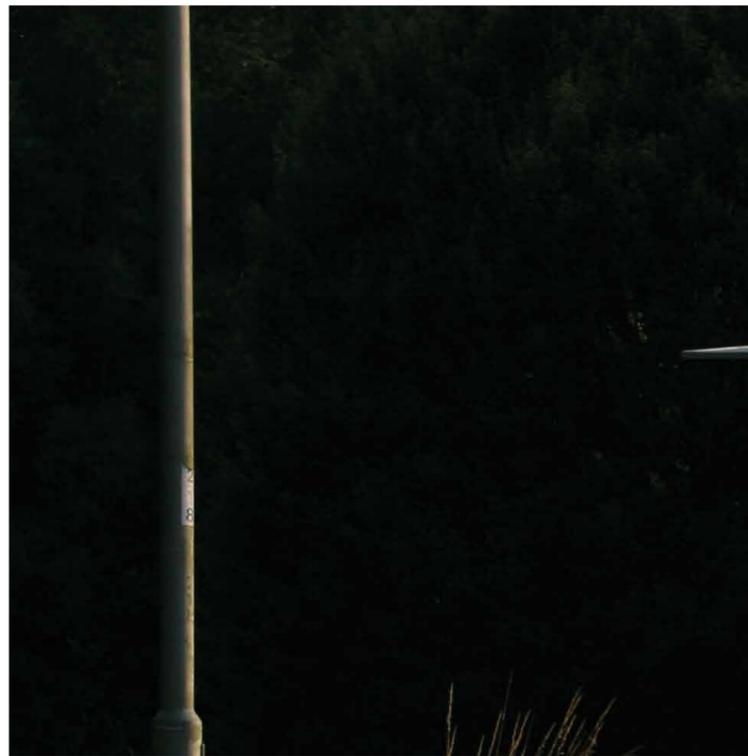

Brett pedestals.

It's no secret that open space in urban centres is becoming increasingly scarce. As architects and developers look to maximise indoor and outdoor living space, previously under-utilised roof areas are becoming an increasingly tempting prospect.

From social amenity and car parks to retail environments and green areas of relaxation, we believe that rooftop spaces can be as usable as any ground-level area. With Brett's range of pedestal systems, from our Standard Fixed Plate Pedestal System, ideal for our concrete and GeoCeramica® Paving and our high-strength Dreen® Fixed Plate Pedestal System to our unique Fixed Head Lock Plate Pedestal System, we can help make your rooftop project a reality.

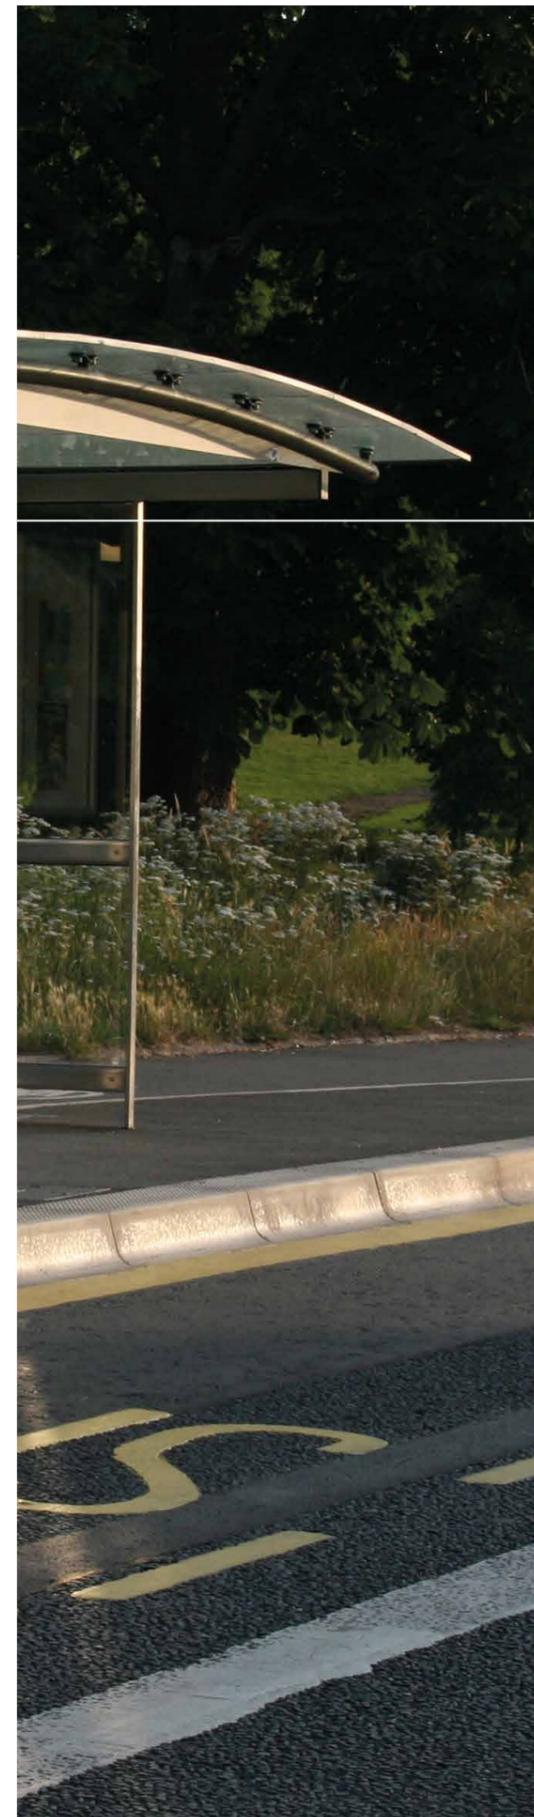

GeoCeramica® Fiordi Sand

Specialist Kerbs

Brett Landscaping is recognised as the UK leader in the design and manufacture of specialist kerb systems. Our Kassel Bus Boarding and Trief containment solutions are renowned for their innovative designs, with high levels of vehicle and pedestrian protection. When specifying Trief we also offer a comprehensive design service to help ensure that you get the optimal solution. As part of this service, we can also produce bespoke units to complete your project.

Our Specialist Kerbs are also complemented with our range of specially designed components, including quadrants, flat blocks and ramps, as well as radial and transition kerbs. These allow the design of a wide range of solutions to address varying site constraints and safety considerations.

Kassel Bus Boarding Features and Benefits

- DDA compliant providing enhanced safety for disabled, elderly or visually impaired passengers and those with pushchairs, without delays
- Tactile diamond-shaped top surface for increased passenger slip resistance
- Available in three heights to provide a vertical/horizontal gap of less than 50mm for improved passenger access and safety
- Available in cast concrete or cut granite
- A range of quadrant and radial units are available to create comprehensive bus stop or station solutions
- Single piece product design provides greater durability than 'built-up' systems
- Compatible with Brett's tactile, flag and concrete block paving ranges

Kassel Kerb with tactile diamond-shaped top surface

Brett Approved Installer Scheme

Becoming a Brett Approved Installer can help you grow your business, through working with high-quality products that customers trust. You'll also benefit from further hands-on experience, training, advice, support and you'll be first in line for our latest product developments and special offers. You'll have access to design and quotation services as well as expert advice from Brett Technical Support, working with you to determine the products and procedures for your specific job. It's all part of establishing you as the Installer of choice within your local area.

Joining the scheme will provide you with access to the following:

- Part of a Community with like-minded professionals
- Technical & Business Support & Assistance
- Promotional merchandise, marketing support templates & PR
- Opportunity to be included in the Brett Branded Literature
- Membership Starter Pack
- Personalised log in to private Brett Approved Installer website portal
- Use of Scheme Logo(s)
- Membership Certificates
- Entry on to 'Find an Installer' on the Brett Landscaping website
- Invitation to join the Facebook Brett Approved Installers Talk group
- 3rd Party associated companies & offers
- Conference & Awards Ceremony
- Loyalty rewards scheme - Every time you buy and register your installation online, you earn

The three-tier scheme system

To get you off to a great start, we have two starter schemes available. Both offering some great incentives, you can get right into everything Brett can offer you as a Brett Approved Installer, or start gradually with Brett Rewards. Once you have been an Approved Member for 12 months, you could be selected as a Brett Premier Approved Installer; in recognition for exceptional work and commitment to the Approved Installer scheme.

BRETT REWARDS

PAVING EXPERTS YOU CAN TRUST

If you're interested in joining our community of Brett Approved Installers, please call [0345 60 80 578](tel:0345 60 80 578) or email us at bai@brett.co.uk

The confidence of a quality referral

As a Brett Merchant or Stockist, you can rely on the support of a trusted, independent business and the quality of our beautifully crafted products. With the added reassurance that you can also recommend a trusted Installer, can help enhance your reputation and encourage related sales.

Quality Installers – Vetting process enables merchants to refer customer to quality installers, enhanced reputation for all. Promoting excellence in all aspects of installation and Service.

More Business – All BAI's must have a nominated stockist where they will purchase Brett products encouraging related sales such as sand, ballast, drainage etc.

Stock Profiling – Regular custom helps to build an efficient stock profile.

Credit Checking – Installers are credit and company checked upon application and at regular intervals by Brett, minimising risk.

Greater profit – The scheme provides an incentive to BAI's to use premium Brett products increasing turnover and profit.

Support – Network of BAI Managers to support the scheme to maximise sales conversions.

Case study

Big design ideas for compact front garden

Brett's multi-functional paving and the ingenuity of a renowned Landscape Architect have helped to create an adaptable, attractive and marketable outdoor space for a Victorian station cottage in Ealing, West London.

Working on behalf of the property's owner, award-winning Landscape Architect Lucy Willcox was tasked with creating a contemporary garden and outdoor dining area, which could also serve as a discreet driveway – a particularly appealing prospect in the busy capital.

Selecting Brett's Omega paving units in a natural finish to complement the colours of the home, Willcox created a two-level design edged with granite borders, providing an attractive and hardwearing space for entertaining which can also be used for parking.

To increase the garden's privacy while also encouraging biodiversity, Willcox's design includes large areas of foliage planted in the upper level of the space, creating a natural contrast with the granite kerbs' hard edges.

The result is an inspiring urban garden which not only enhances its owner's home, but which increases its potential resale value.

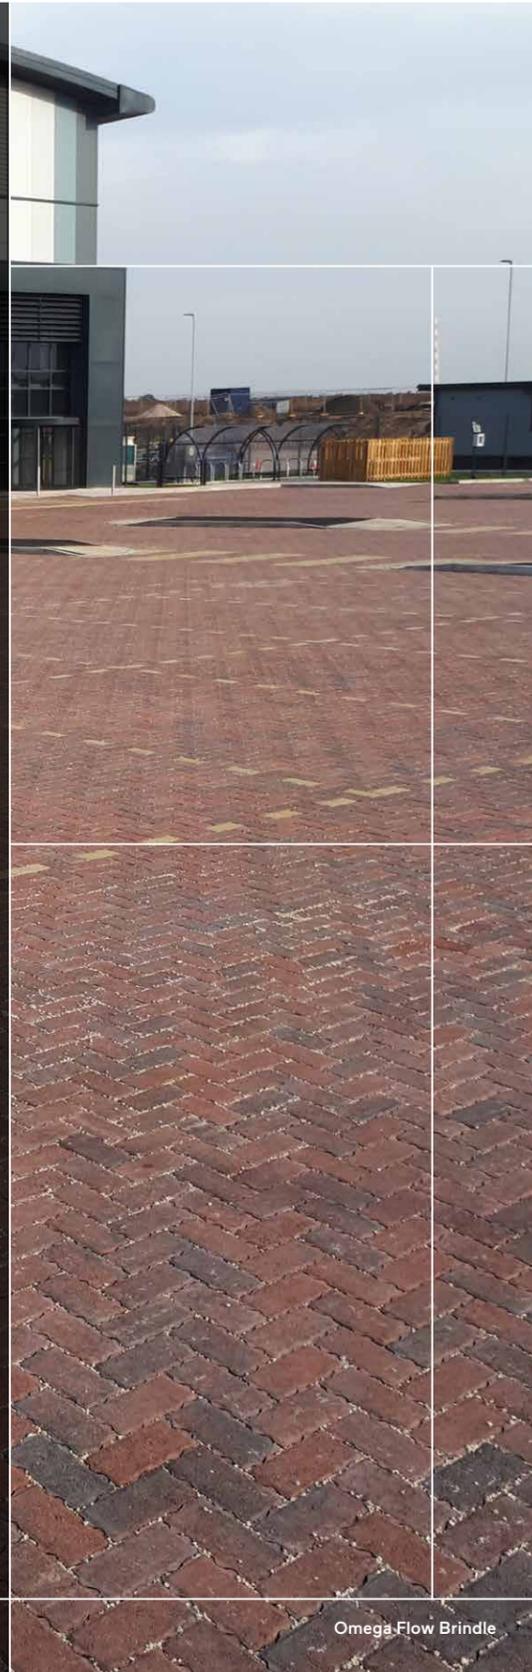

Case study

Brett delivers water management and car park in one solution

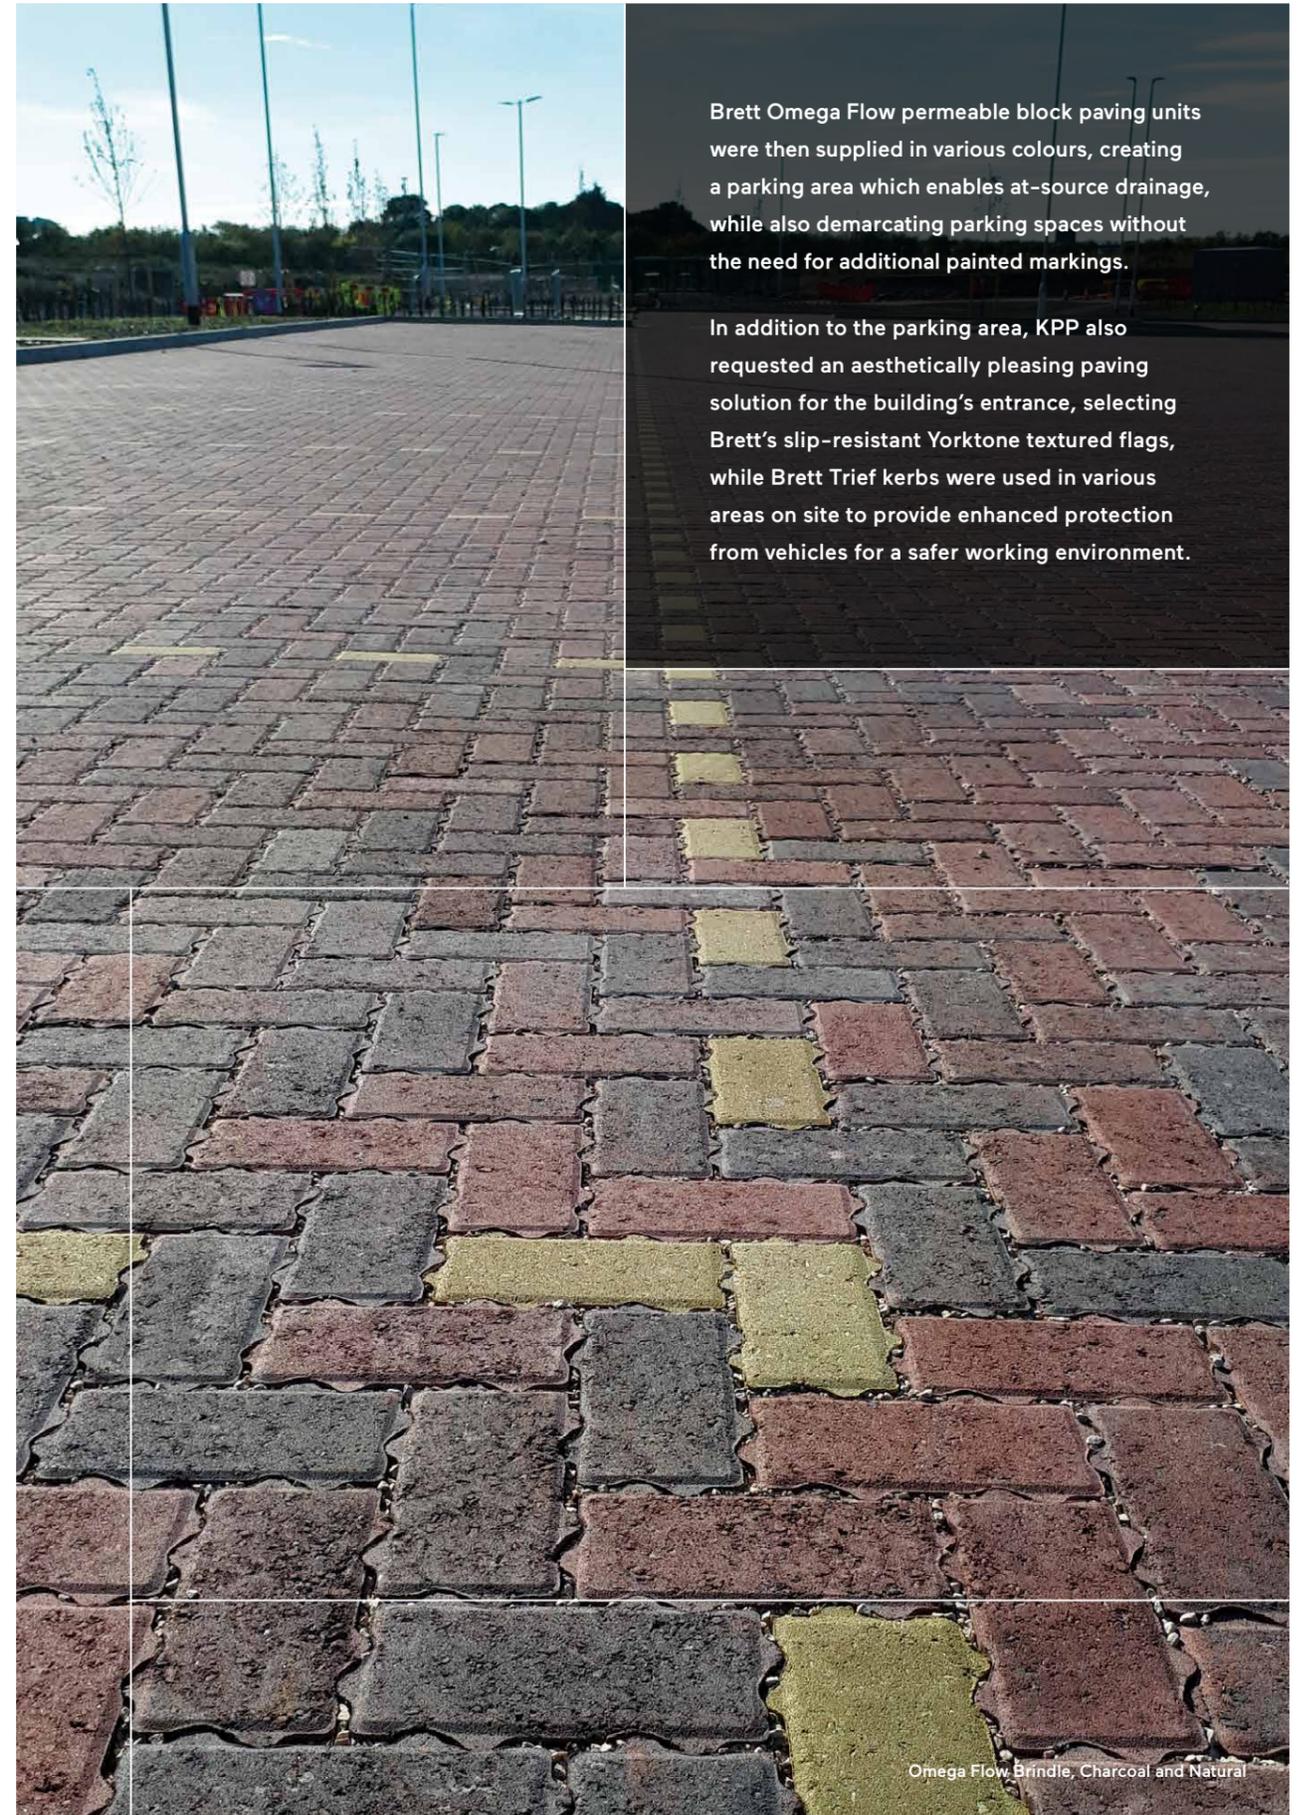

Products and technical support from Brett have assisted in the creation of a permeable car parking solution for logistics and warehousing company DB Symmetry's Doncaster distribution centre.

Working with Architects from Kilmartin Plowman and Partners (KPP), Brett was tasked with providing paving units which would not only be able to support the weight of emergency fire vehicles, but which would also allow the creation of a fully SuDS-compliant design, in line with Bassetlaw District Council's flood prevention strategy.

To achieve this, Brett's experts recommended the use of a hydraulically-bound road base, providing suitable structural integrity without the added cost and timeframes associated with the installation of a bituminous base; further reinforcing Brett's 'built on relationships' philosophy, to deliver tangible value and real results for its customers.

Omega Flow Brindle

Brett Omega Flow permeable block paving units were then supplied in various colours, creating a parking area which enables at-source drainage, while also demarcating parking spaces without the need for additional painted markings.

In addition to the parking area, KPP also requested an aesthetically pleasing paving solution for the building's entrance, selecting Brett's slip-resistant Yorktone textured flags, while Brett Trief kerbs were used in various areas on site to provide enhanced protection from vehicles for a safer working environment.

Omega Flow Brindle, Charcoal and Natural

Associated Businesses

Brett Group

Through a thorough understanding of our audiences, Brett has become one of the largest independent construction and building materials suppliers in the UK. With a comprehensive customer support package, together with our expertise, innovative development programmes and ultimate customer knowledge spanning over 100 years, Brett can confidently bring you products and services to make even the most complex project easier.

Brett Aggregates

Brett Aggregates supplies a wide range of traditional and recycled products from our 32 sustainably managed quarries, as well as from the seabed together with Britannia Aggregates and Volker Dredging. To bring your outside spaces to life, we can comfortably offer the most comprehensive aggregate portfolio to help you realise your vision. From decorative finishes and landscaping highlights to permeable water management solutions, our aggregates provide a lasting, durable, yet simple-to-install aesthetic to your projects.

Brett Concrete

Our Brett Concrete operation includes 17 quality-controlled plants across South East England producing ready mix and floor screed solutions for every type of construction project.

Capital Concrete, London

Our partner, Capital Concrete, increases our capability with batching plants serving the London area – from Bow, Croydon, Rainham, Romford, Wembley and our large-capacity plant at Silvertown.

Granite Products, Jersey

At Brett, we want to ensure we can offer a world of possibilities for all our construction industry clients. Which is why we have Granite Products. Based in Jersey, Granite Products supplies aggregate, ready-mixed concrete and concrete blocks. Since 1946, we've supplied housing developments and successfully completed a number of major projects within the commercial sector including a new control tower for Jersey Airport.

Resources

To help our customers enjoy the very best outcomes for their projects, we've invested in ensuring our website is as informative as it is exciting for our customers and includes simple-to-access information from useful BIM objects, product calculators and CPD opportunities to providing handy downloads.

BIM

We have developed a comprehensive selection of free-to-use BIM objects to help Architects, Landscape Architects, Contractors and Installers design and plan projects whilst getting the best out of our products. Available in industry-neutral IFC format and formats compatible with Autodesk Revit, ArchiCAD, Vectorworks, Tekla and Bentley, these tools provide problem-solving solutions before a project begins.

CPD

At Brett, we know a great job doesn't rely solely upon our products. Which is why we offer RIBA Accredited and non-accredited CPD presentations to help our commercial customers build on their skills whilst achieving points towards their annual requirements.

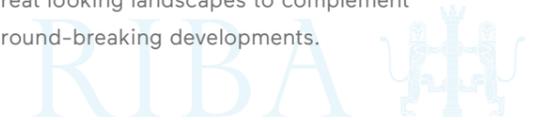

GeoCeramica® Fiordi Grigio, Fumo and Sand

Brett is all about making outside space easy. Not surprising, then, we've partnered with the National Building Specification (NBS) to provide our customers with complete NBS Plus product listings. This service has been created to help specify our products into customers' projects, bringing a thorough understanding of what's suitable to help the design and planning process.

RIBA Plan of Works

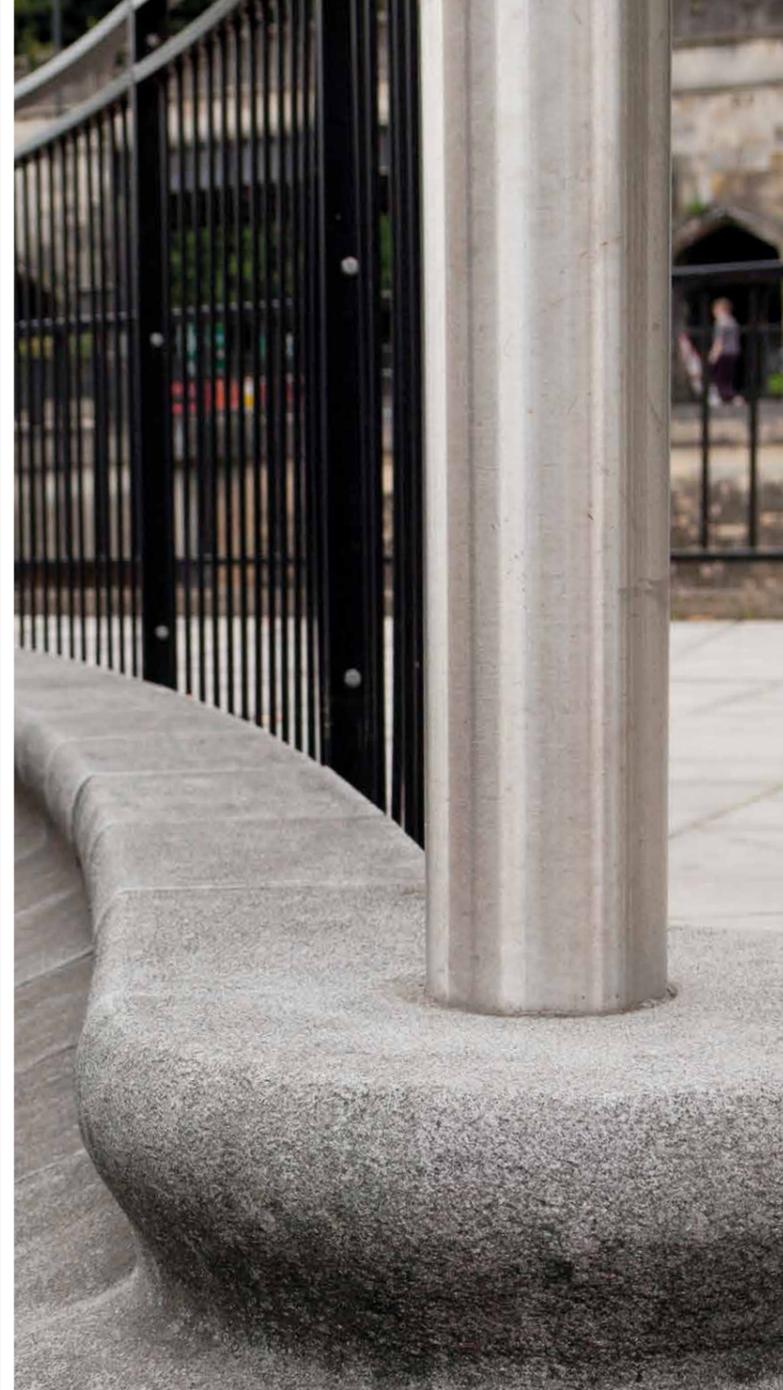

The right landscape can enhance a building or development design, which is why we establish good working relationships with the right people to deliver a scheme to be proud of. Brett works with RIBA and The NBS to provide the widest range of specification tools to enable Architects and Designers to create great looking landscapes to complement ground-breaking developments.

Resources

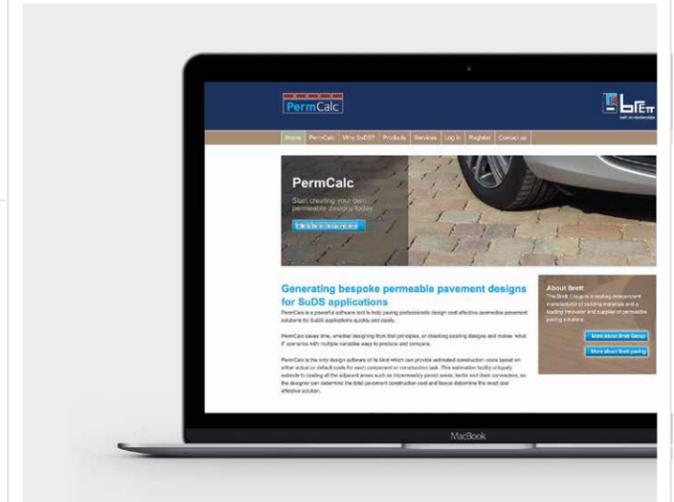

Trief Containment kerb

Trief Kerb Radius Calculator

The Brett Trief Containment Kerb has been helping to improve road safety in the UK for over 50 years, and has been specially engineered for curved as well as straight sections of the carriageway. To ensure radial planning is accurate, we've developed a calculator tool that works out the calculations, creates a pdf and emails it directly to the customer's email address. To find out more please visit:

brettlandscaping.co.uk/professional

PermCalc

Brett understands the challenges the building industry faces today, including having to deliver sustainable water management solutions to meet current regulations. As a leading innovator of permeable paving solutions, Brett designs cost-effective permeable pavement solutions for SuDS applications, and we've developed PermCalc to help Contractors and Specifiers save time when determining the total pavement construction cost. PermCalc is the only design software of its kind which can provide costed design for both the hydraulic and structural requirements of a permeable pavement, based on either the actual or default cost for each component or construction task. To discover how PermCalc can help you get it just right, visit www.permcalc.co.uk

Omega Flow Burnt Oak

Ethical Trading Policy

At Brett, we're known for our high-quality products and impeccable customer service, but more, we're recognised for our credibility, integrity and trustworthiness.

We're committed to upholding the highest ethical standards, and as such, we actively monitor our supply chain with a view to ensuring that our suppliers are working to provide a moral code for the treatment of workers across the World.

Brett collaborates to help improve working conditions and best manage our environmental impacts, ensuring our sites meet the RSP Guidelines, to help improve working conditions and minimise the environmental impacts for the long-term benefit of everyone.

Responsible sourcing

Brett Landscaping is committed to a policy of no harm within our supply chains. We ensure that we achieve this through a number of auditable processes.

Brett Landscaping was one of the first manufacturers within our sector to achieve certification to the BES 6001 Responsible Sourcing of Construction Products and now hold the highest 'Excellent' rating highlighting how well we perform as a business.

A key part of this is that we report annually to all of our stakeholders via our website; if you want to see how well we performed please visit brettlandscaping.co.uk

Environmental Product Declaration (EPD)

Brett Landscaping have worked with the British Precast Concrete Federation (BPCF) to develop an Environmental Product Declaration for our concrete paving and kerb products.

Ethical Sourcing of Natural Stone

At Brett Landscaping, we ensure our sites meet stringent RSP Guidelines to help us best manage our ethical trading activities in the highest risk areas of our business.

Carbon Reduction

Since 2011 Brett Landscaping has been actively measuring our Carbon usage across all of our hard landscaping products, reducing our Carbon usage year-on-year.

Sustainability Charter

Brett is a signatory to the BPCF sustainability charter, focusing on the issues that have the greatest impacts on economic viability, social progress and environmental performance in the precast sector.

Policies

Corporate Social Responsibility

Brett Landscaping aims to do everything possible to build strong, long-lasting relationships with local communities in the areas where we operate. And we maintain our sites to ensure people, communities and businesses are protected from any hazards or dangers.

We are also keen to get involved with community and employee sponsorship and charitable donations, including donating construction materials, time and expertise via our Community Engagement.

Community Engagement

We are passionate about the design and creation of enjoyable and accessible environments within the local community, as well as at home. Such spaces, especially those which promote greenery, trees and wildlife, bring people together, helping to build and protect our most valuable national resource; outside space.

Brett Landscaping helps support individuals and communities who have a desire to renovate public outdoor spaces. We've been involved in many admirable schemes in the past and look forward to supporting future developments, to give something back and make a difference to the environment for future generations to enjoy.

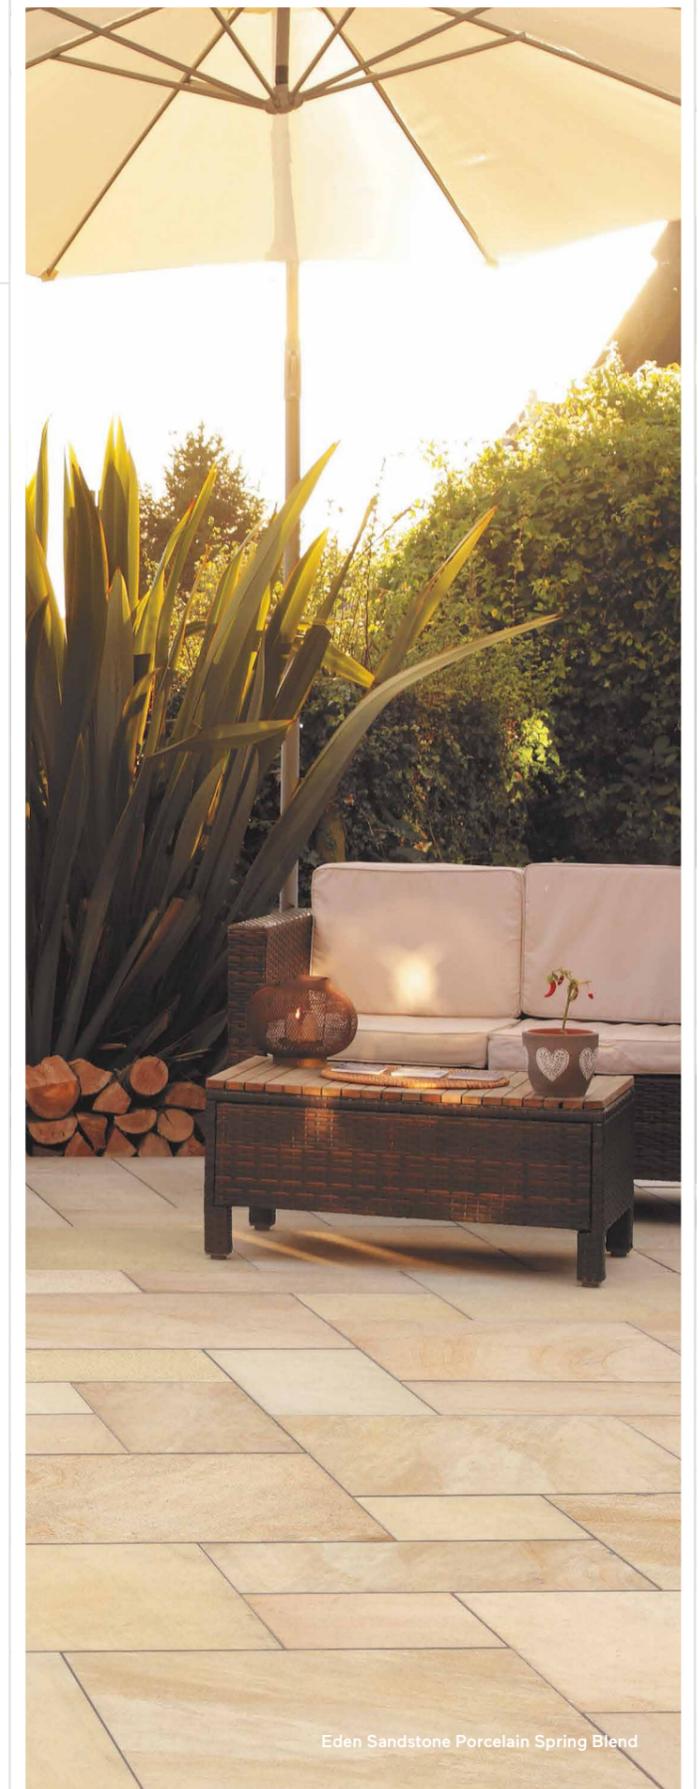

UKCA Marking & Declaration of Conformity

All Brett Landscaping products, along with products from across the Brett Group, have been extensively tested and proven to conform to the relevant UK Standard(s). This is our customers' assurance that they are safe to use and fit for purpose.

To obtain a copy of the CE Certificate and/or Declaration of Conformity (DoC) relating to any Brett products, please visit our website at brettlandscaping.co.uk

Should you have any additional questions regarding these certificates, or the technical specification for any of our products, please contact the Brett Landscaping Technical Services Department by e-mailing us on landscaping.enquiries@brett.co.uk or by calling **0345 60 80 579**.

Please note – CE certification is not required for any materials where there is no harmonized European product standard available.

Eden Sandstone Porcelain Spring Blend

Sustainability

For over 100 years, Brett has embraced its corporate and social responsibilities to customers, the community and to the environment. Brett is a business proud of its independent status, strong values, and a real, tangible passion for a sustainable future.

With that philosophy firmly in place, we continue to work to reduce our impact on the environment, minimising our energy usage and maximising the recyclability of our materials; developing product solutions and services to enhance the built environment and the lives of the people who use it.

Working with Brett Landscaping enables the creation of sustainable developments. Particularly those projects that have been commissioned under the Code for Sustainable Homes or the Building Research Establishment Environmental Assessment Method.

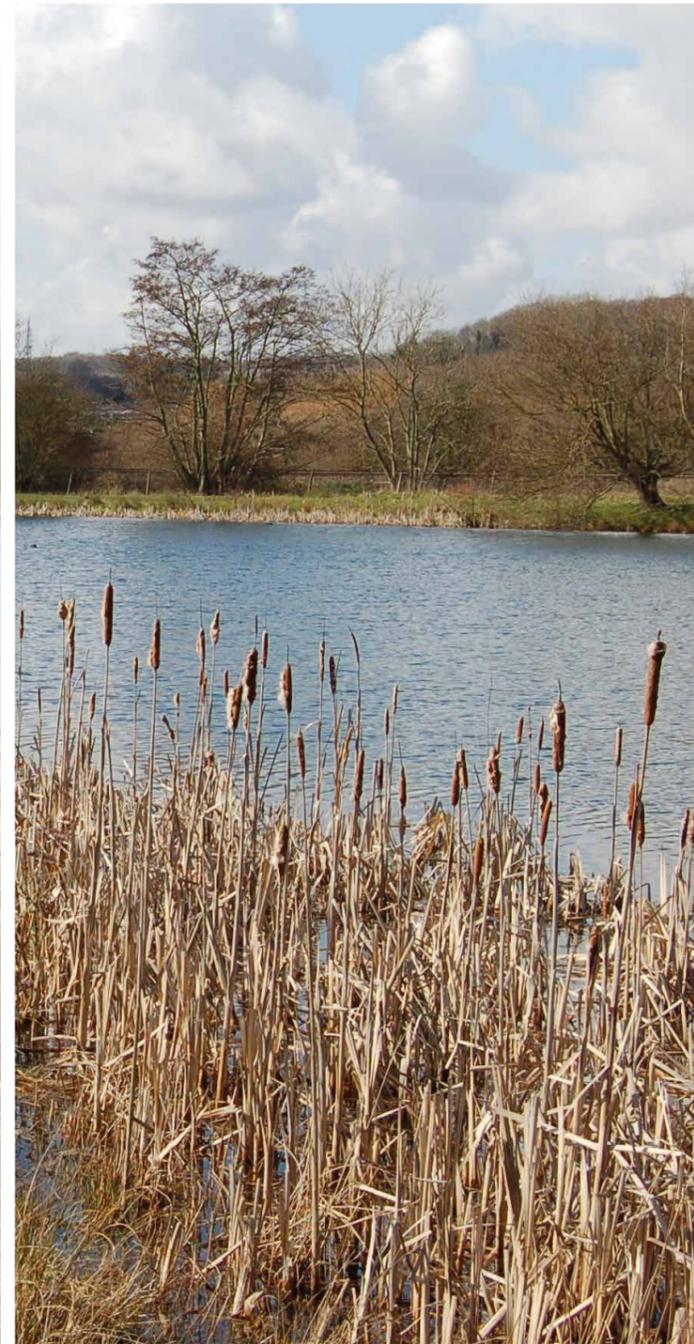

BRE Green Guide

The BRE Green Guide to Specification provides an independent assessment and endorsement of the law for the environmental impact of construction materials. Materials and components are assessed in terms of their environmental impacts, across their entire life cycles. The guide provides easy-to-use guidance on how to make the best environmental choices when selecting construction materials and components.

The information helps specifiers to design, construct and manage buildings to reduce environmental impacts. These rankings are presented on an A+ to E scale, based on life cycle assessments (LCA), using environmental profiles methodology. The guide covers a range of generic building types and elements.

Most Brett products are top rated, enabling you to specify our hard landscaping systems with the confidence of achieving an A or A+ Green Guide rating. In turn, this positively contributes when constructing specifications using BREEAM to assess the sustainability characteristics of the structure and its hard landscaping.

British Precast Concrete Federation Sustainability Charter

Brett is a proud signatory to the BPCF Sustainability Charter, a directive by which its member companies demonstrate their motivation to go beyond legislation, undertaking voluntary actions to improve performance on a range of sustainability issues.

Below are just some of the principles that we have adopted:

- **Develop products that improve the quality and sustainability of the built environment**
- **Liase effectively with local communities to foster mutual understanding and respect**
- **Manage all waste streams effectively and minimise waste disposed to landfill**
- **Measure, report and improve performance on sustainability issues**
- **Minimise pollution and emissions associated with production and transportation**
- **Operate in a responsible manner to protect employees, contractors and visitors**
- **Operate to the highest ethical standards necessary to develop a skilled and competent workforce**

The future looks good

Urban landscapes are changing for many reasons; climate change, new regulations on greener, more sustainable developments and, particularly within the residential sector, the desire for more inspirational outdoor spaces. These are exciting times in the construction sector – to be bold, subtle, extravagant, minimal, contemporary or traditional. Together, we can create the environments needed to satisfy the style of a more modern world, the necessities of ever-more environmentally aware customers, and the practicalities to enhance projects that also represent value for money.

With new technologies and our ongoing commitment to responsibly sourcing our materials, we aim to help Architects, Landscape Architects, Designers, Contractors, Homeowners, Merchants and Installers to create outside spaces that make a real difference.

At Brett we focus on the 'human' element. Delivering a collaborative, straightforward service and quality products. It's how we've built our relationships, and it's how we'll help deliver a more beautiful, practical, sustainable future landscape.

Brett. Built on Relationships
