Understanding How Containment Kerbs Contribute to Safety in Urban Design.

This 45 minute presentation demonstrates how the correct specification of specialist containment kerb systems can passively enhance safety and improve access for all users of our road transport infrastructure.

The RIBA Core Curriculum topic areas covered:
• Health, safety & wellbeing
• Business, clients & services
• Places, planning & communities
• Design, construction & technology

Key Learning Objectives:
• An understanding of what a containment kerb is and how they work
• An overview of the correct application of containment kerbs in urban design
• An awareness of the guidance and legislation for the use of containment kerbs
• A review of the containment kerb components and their safe installation
• Awareness of how containment kerbs passively enhance road safety
Brett Landscaping are one of the UK's leading manufacturers of high quality paving products, with an offer that includes concrete block paving, concrete garden paving, permeable paving and specialist kerb systems, as well as ethically sourced natural stone and porcelain. All of our products are supported by a comprehensive technical and design service which has the flexibility to accommodate commercial, public sector and domestic projects.

We work hard to share our expert knowledge about paving with architects, engineers and designers helping you to achieve the best looking, most durable and cost effective paving solutions for your projects.
