

SuDS and the Role of Permeable Paving.

This 45 minute presentation provides guidance as to why concrete block permeable paving should be considered as a solution for Sustainable Drainage Systems (SuDS) along with the legislative drivers and how compliant systems can be designed.

The RIBA Core Curriculum topic areas covered:

- Architecture for social purpose
- Legal, regulatory & statutory compliance
- Sustainable architecture
- Places, planning & communities
- Design construction & technology

Key Learning Objectives:

- An understanding of why we need Sustainable Drainage Systems (SuDS)
- A review of Government & Local Authority policy and the key drivers behind SuDS
- Clarification of what SuDS are, the SuDS management train and how permeable pavements work
- An understanding of both the design and construction of permeable pavements to BS 7533 part 13
- Awareness of the compliant materials used to construct a permeable pavement
- An overview of the maintenance requirements of permeable paving

What can we do for you?

Brett Landscaping are one of the UK's leading manufacturers of high quality paving products, with an offer that includes concrete block paving, concrete garden paving, permeable paving and specialist kerb systems, as well as ethically sourced natural stone and porcelain. All of our products are supported by a comprehensive technical and design service which has the flexibility to accommodate commercial, public sector and domestic projects.

We work hard to share our expert knowledge about paving with architects, engineers and designers helping you to achieve the best looking, most durable and cost effective paving solutions for your projects.
