

Introducing our New Omega Kerb!

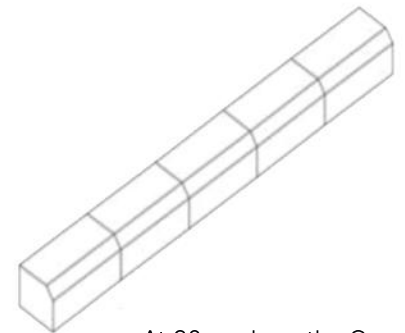

Designed to integrate with all Brett standard concrete paving ranges, Omega Kerb is the perfect accompaniment to our Omega block paving products.

Available in two of our most popular edging colours, Omega kerb's 200mm length allows fewer units to be used to create borders and boundaries, saving installation time while offering excellent value for both DIY projects and professional installations.

Benefits of Omega Kerb:

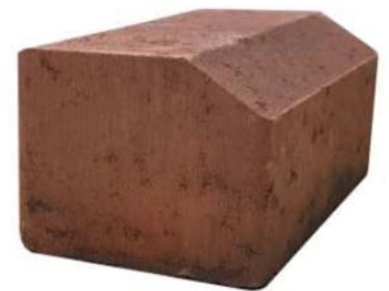

- o Larger kerb
- o Requires 50% fewer kerbs per Linear.m.
- o Saves money
- o Saves time
- o Easy to create 45° angles and angled cuts

At 200mm long the Omega Kerb only requires 5 Units per Lin.m.
