

# BRETT GROUP TRANSPORT POLICY

The Brett Group will act to reduce the adverse social and environmental impacts of transport associated with the delivery of our product to customers.

## In order to achieve this we will:

- Minimise transport of our products through effective route planning and wherever possible reduce unladen road mileage.
- Monitor and review distances travelled and types of transport used to deliver constituent materials and deliver products.
- Promote alternative delivery methods such as barge or rail wherever practicable and viable.
- Ensure delivery drivers have undertaken training in safe, fuel efficient and considerate driving.
- Minimise neighbourhood impacts by ensuring that any restrictions in vehicle movements are adhered to.
- Minimise impact by ensuring products are transferred in appropriate vehicles suitably packaged and secured.
- Consider the use of alternative fuels, fuel efficiency and safety standards when purchasing new equipment or vehicles.
- Dispose of vehicles responsibly at end of life.

A handwritten signature in black ink, appearing to read 'Bill Brett'.
